AYRES

BLIGHT RESISTANT PEAR

• MELTING • JUICY • SWEET

BLOOMS LATE ESCAPING SPRING FROSTS

This new blight resistant variety developed by Dr. Brooks Drain and released by Tennessee Agricultural Experimental Station will open new fields for pear culture in the Central and Southern States whereas in the past only shipped-in pears have been marketed. This new variety has been found to be highly resistant to blight.

The new Ayres pear was obtained by crossing Garber with Anjou. It has all the great qualities a fine pear should have, fruit beautiful golden-yellow overlaid with bright rose blush, medium size, excellent flavor, juicy, sweet, subacid, sprightly, simply melts in your mouth; described by many as the "best pear they ever tasted." Ripens mid-August to early September. Fine for desserts and canning. Trees productive, large, vigorous, upright until bent with loads of fruit. Flowers open medium to late usually escaping spring frosts. For pollination plant Orient or Dabney. Be among the first to plant this outstanding pear.

MAYFLOWER (1)—Earliest Peach known. Dark red all over; beautiful appearance. Carries well to market. Blooms very late. Crop never entirely cut off by late frosts. Size medium, quality good. Cling.

RED BIRD (1A)—A large handsome peach, bright glowing red on a background of creamy white. Flesh fine quality, white and firm, making an excellent shipper. This peach brings premium prices on the market due to being among the first to ripen together with its size and color. Cling.

HILAND (1B)—A cross between Southland and a seedling of Hiley by Hale Haven, formerly tested as FV 123-41. Ripens a day earlier than Cardinal or 5 days before Dixired. Trees are vigorous and productive. Fruit medium size, attractively colored with light-red blush covering about 1/2 the surface. Flesh is yellow, firm and of good flavor. Blossoms large self-fertile, opens shortly after Hiley. Because of its low chilling requirements it is especially recommended for the Gulf States and the deep South. (Clingstone).

CARDINAL (1C)—Finest of early Peaches. A seedling of Hale Haven selfed. Formerly used as FV-101. Ripens 4 days ahead of Dixired and 6 1/2 weeks before Elberta. Flesh is yellow, firm but melting and of good flavor and size. Color a bright attractive red blush over a yellow background. Very productive. Quality and appearance will make this Peach a leader. Blossoms medium size, self fertile and open shortly after Elberta. Highly recommended for commercial planting and Home Orchards throughout the Peach growing sections. (Clingstone).

REDCAP (1D)—A new Clingstone formerly tested as FV 121-58. A cross between Southland and Dixired. Ripens 3 days after Cardinal and a day or two earlier than Dixired. Fruit is medium size. Three-fourths of surface covered with a bright red blush. Flesh yellow, firm but melting of good flavor. Trees are moderately vigorous and productive. Blossoms small petaled, self-fertile, opening the same time as Southland. Due to its low chilling requirements it is well adapted to the South.

MAYGOLD (1E)—A new introduction thriving throughout the South requiring only 600 to 650 chilling hours, formerly tested as FV 132-12. A cross between Sunhigh and Southland. At Fort Valley, Ga., Maygold blossoms 2 to 15 days before Hiley and approximately 5 weeks before Elberta. Fruit ripens 3 days earlier than Dixired, having attractive red blush over yellow ground. Medium size, cling stone. Flesh yellow, firm but melting, good flavor. Tree vigorous and productive. This variety is recommended for trial in Georgia, West Florida, Mississippi, Louisiana, Alabama and South Carolina.

CORONET (2)—A cross between a seedling of Halehaven selfed and Dixigem, formerly tested as FV 126-79. Ripens 2 or 3 days earlier than Dixigem and 4 days before Red Haven. Fruit medium size, about three-fourths of surface covered with a bright attractive red blush over a yellow background. Flesh is yellow, firm but melting, smooth textured and of good flavor. Near-freestone when fully ripe. Trees are vigorous and productive. Blossoms small petaled, self-fertile, opening shortly after Hiley. Chilling requirements slightly less than Elberta. We recommend this peach for commercial as well as home orchard planting.

DIXIRED (2A)—A new early yellow Peach, ripens 2 weeks before Golden Jubilee, attractive over all red color—good quality; firm shipper; productive. Clingstone, medium size, round with light fuzz. Flesh is yellow, firm but melting, medium textured and of good flavor. The outstanding characteristics of Dixired are its unusual firmness and slow rate of softening for an early Peach, plus an attractive appearance. Recommended as an early shipping Peach.

SUNHAVEN (2B)—A new introduction recommended for early market. Matures ten days earlier than Red Haven. Fruit large, bright red with stoneground color. Fruit keeps and handles well for such an early variety. Flesh fine textured, firm, excellent flavor. Freestone when fully ripe. Trees large, vigorous and productive.

JERSEYLAND (3)—A new early variety introduced by the New Jersey Peach Council. Fruit large and firm, skin red, flesh yellow, freestone, ripening five weeks before Elberta. Hardy, sets fruit buds freely. Excellent shipper. Highly recommended for early local markets and commercial production.

Dixigem

Mountain Grown PEACH TREES

AMERICA'S BEST VARIETIES
TESTED and GUARANTEED

NOTE: Ripening order of varieties designated by bracketed numbers after name. Varieties overlapping in ripening season indicated by sub-letter. Example: Elberta and Hale are about same season and are designated by numbers 13 and 13A.

DIXIGEM (3A)—A new early, yellow-fleshed Peach, ripens several days ahead of Golden Jubilee. Fruit is medium size, with light fuzz, and bright, attractive, yellow with red blush covering about half the surface. The flesh is yellow, medium to firm, fine texture and excellent flavor. Almost a freestone when fully ripe and usually semi-free at shipping stage. The trees are vigorous and productive. Exceptionally fine for freezing. Recommended as an early yellow shipping variety for all Peach growing sections. It shows possibilities of stepping up our commercial yellow Peach season.

REDHAVEN (3C)—Another great commercial Peach from the South Haven Experimental Station. Withstands very low temperatures. Yellow-fleshed. Freestone; very firm. Ripens 5 days before Golden Jubilee. It colors a brilliant red and beautiful yellow. Skin is smooth, almost fuzzless, resembling J. H. Hale in color, skin and flesh. Excellent for shipping and freezing.

GOLDEN JUBILEE (4)—A Proven Money Maker. Developed by New Jersey Experiment Station, and stands without an equal as an early, yellow, freestone Peach of exceptional quality. Tree is unusually hardy. Buds resist low winter temperatures better than most varieties, ripening 3 to 4 weeks before Elberta. Good freezing qualities.

KEYSTONE (4A)—A large, round, highly colored, yellow fleshed peach of excellent quality having attractive red blush over bright golden ground color. Flesh yellow, firm, smooth textured and of good flavor. A cross between Southland and Newday ripening just after Golden Jubilee or 3 to 3½ weeks ahead of Elberta, tested as FV-177-17. Resistant to bacterial spot. Freestone. Trees vigorous and productive. Chilling requirements approximately 750 hours. Blossoms are small petaled, self-fertile, open about same time as Newday and Southland. This peach is one of the most popular of the newer varieties now being widely planted by commercial orchardmen.

EARLY HILEY (4B)—Medium size, white, freestone Peach, of Georgia Belle type, ripening 10 days before Hiley Belle and 24 days before Belle of Georgia. Because of its excellent quality, fine flavor, beauty of color and early ripening, is widely planted both commercially and for Home Orchards. This Peach thrives well in the extreme Southern States due to short chilling requirements.

TRIOGEM (4C)—An early, oval, solid red, firm, yellow freestone peach ripening usually about two days after Golden Jubilee or 20 to 25 days before Elberta. The trees are medium in size, hardy and heavy bearers. TrioGem has fruited over a wide area and has gained in popularity due to heavy yields, hardness and good marketing traits.

RANGER (4D)—A new U.S.D.A. introduction. A valuable peach for central peach areas for local or commercial markets. A yellow freestone peach, highly colored with bright red. Flesh yellow, medium firm, fine flavor. Recommended for canning or freezing. Ripens with or just after Golden Jubilee.

MEDIUM EARLY VARIETIES

SOUTHLAND. (Introduced Summer, 1946) (9)—The Southland is the Peach sensation of the age; ripens approximately 16 days before Elberta. Fruit is freestone, medium to large, round with a light fuzz. Attractively colored with light red blush covering about half the surface at shipping-ripe stage. Flesh is yellow, firm, slow-softening, medium textured, good flavored. Excellent freezing qualities. Trees vigorous and productive. We have dropped peaches of similar ripening season, in favor of Southland since it has all the good qualities and none of the unsatisfactory ones. You should get in on the ground floor with this fine shipping Peach, it will make you real money. The best and earliest yellow Peach for commercial growers in the world today.

SUNHIGH (9A)—Another introduction from the New Jersey Experimental Station. A large, bright red, smooth Peach which colors well over before ripening. Firm yellow flesh sometimes adheres to pit when hard ripe, generally freestone. Recommended for commercial planting. Short chilling requirements make this Peach well adapted to the far South.

See Peach Tree

Prices on Page 4

HALE-HAVEN (10)—North, South, East and West join in acclaiming this great Peach. Hailed by many to be "the greatest Peach of all time for its season." We endorse and recommend this great Peach to growers in all sections where size, color, quality and shipping ability are paramount consideration. Strong, thrifty grower. Fruit is large, oval-shaped, good tough skin, will not bruise easily, has a beautiful, handsome red color that attracts the buyer at once. Flavor unexcelled. Good freezing qualities. The Hale-Haven is a product of South Haven Experimental Station in Michigan. Be sure you are getting the True Strain of Hale-Haven trees when you plant. Buy Tennessee Nursery's Hale-Haven trees.

BURNETT'S EARLY ELBERTA (10A)—A great commercial Peach. The highest quality of all Elberta types, ripening two weeks before Elberta. A large, freestone Peach, of excellent quality, golden yellow blushed with red. Trees hardy, thrifty and bear consistently. Highly recommended for Home Orchards and Roadside Markets.

SULLIVAN'S EARLY ELBERTA (11)—A new red bud sport of the famous Elberta, ripening 7 to 10 days earlier. Well adapted to entire central Peach growing area as well as southern Peach states. Characteristics identical with Elberta. Our trees are propagated from original strains. Ripens ahead of Great Elberta and Belle of Georgia; averages large in size, extra fine quality and shows good shipping ability. We have long needed a good commercial Peach to fill this ripening time. This Peach has real possibilities and we recommend it highly.

SOUTH HAVEN (11A)—One of the earliest introductions of the South Haven Experimental Station. Very hardy in bud, good growing tree, large fruits of excellent quality and a freestone. Highly recommended for road stands and nearby markets. Golden Yellow with reddish blush. Juicy and deliciously sweet. Ripens ten days before Elberta. This variety is fast increasing in popularity.

60 YEARS OF EXPERIENCE

MEDIUM EARLY VARIETIES Continued

REDELBERTA (12)—Pat. Expired. This excellent peach has all the Elberta characteristics and qualities **PLUS fully double the red color**, ripens several days earlier. The fact that this Peach can be harvested and shipped days ahead of Elberta and possesses the long established time-proven qualities of its parents makes it one of the most desirable Peach for both Roadside Stands and commercial planting.

REDSKIN (12A)—A new introduction by University of Md. Exp. Sta., a cross between Hale and Elberta, ripening slightly ahead of Elberta. Extremely hardy in bud. Fruit round, firm, large well colored, having a deep red blush. Flesh yellow, fine flavor. Freestone. Excellent for canning.

BELLE of GEORGIA (12B)—The white Peach that is the leader of all white Peaches of its season. Adapted to large commercial planting in all Peach producing areas. Fruit large, bright attractive red almost covering the Peach with white background. Flesh white, highly flavored, very firm. One of the best shipping white Peaches. Tree very vigorous, hardy and productive. A freestone.

MID-SEASON VARIETIES

THE GREAT ELBERTA — THE KING OF ALL PEACHES. The world's leading Peach, adapted to various soil and climatic conditions throughout the U.S. and Canada. Whether the soil is light, sandy or heavy clay, or the weather hot or cold, Elberta may be depended upon to give you excellent results. Trees hardy, vigorous and productive. Flesh yellow. Fruit large, freestone, skin deep golden-yellow, highly colored red cheeks. Flesh while tender and juicy, is unsurpassed for its ability to stand long distance shipping. It is estimated that 50% of all Peaches planted are Elberta.

J. H. HALE (13A)—The Million Dollar Peach. Always in demand for fancy dessert purposes, both fresh and canned. Housewives endorse it by paying bigger prices for it. Excellent freezing qualities. J. H. Hale is an extra big, round highly colored beauty with golden skin and flesh. Fine grained, firm, juicy, exquisitely flavored. Skin almost fuzzless. Freestone. Tennessee Nursery's strain is brighter and more prolific than ordinary strains!

AFTERGLOW (13B)—Ripens 3 to 5 days after Elberta. A New Jersey introduction. Fruit large, oval, almost completely overspread with red. Flesh yellow. Freestone. Trees vigorous. Fruit buds very hardy. Recommended to extend peach season.

BRACKETT (14B)—Comparatively new variety in some sections, but proved one of the most profitable in the South. About 5 days after Elberta. Beautiful orange-yellow skin tinged with carmine. Flesh deep yellow and much higher flavored than Elberta. Recommended for its fine freezing qualities. Sizes up well under heavy crops and equal to Elberta as a shipper. A perfect freestone.

SHIPPER'S LATE RED (14C)—A favorite wherever planted. Hard to equal as a large, productive, handsome Peach to follow Elberta. Very highly colored, attractive red, yellow-fleshed freestone, good quality Peach, of distinct Hale type. Ripens just after Elberta and J. H. Hale. Good shipper, extremely productive. Very hardy, brings top prices on the market. We know of no variety we can recommend more highly to follow Elberta. Much confusion exists regarding the various strains of this variety. We are growing the true Hale type as determined by comparison with fruit in U. S. D. A. test orchards.

RIO-OSO-GEM (14D) CONSIDERED BY MANY TO BE THE BEST LATE VARIETY PEACH EVER INTRODUCED. A brilliant-red, late, yellow fleshed freestone, Hale type peach, ripening 7 to 10 days after Elberta. Ranks high as a commercial peach due to its red color, enormous size, firm, fine textured flesh and excellent flavor. Unexcelled for shipping, freezing, canning and eating fresh. Has been fruited in all peach growing districts of U. S. and Canada and has definitely proven itself to be the best late commercial variety. Trees are hardy and produce heavy crops. The fruits holds up longer after being picked than any other variety. Crops have been reported to average 3/4 pound per peach. Originated in California, introduced under plant patent No. 84 in 1934, patent now expired.

behind the Selection of these ... BEST VARIETIES!

LATE ELBERTA (15)—Elberta type peach ripening after Shipper's Late Red. Flesh yellow, excellent quality. Fruit is large, well colored with red blush when tree ripe. Recommended to extend the peach season.

OLD-FASHIONED WHITE-ENGLISH PEACH (16)—Nearly as large as J. H. Hale. Skin creamy white, very seldom with any red; flesh pure white to the stone; fine for preserving. One of the finest eating Peaches. Clingstone. We have the Genuine Old-Fashioned White English.

OLD-FASHIONED RED INDIAN CLING (17)—Heavy bearer, long-lived. An old favorite. The Red Indian is one of the best all-purpose Peaches grown. Unequalled for eating, pickling, and freezing, and the trees are unsurpassed in horticultural beauty. There are many strains of Red Indian Peaches on the market. Many are small and undesirable but we believe our strain is the very best. Trees are beautiful and healthy, well adapted to most all parts of the country. The true strain Indian Peach is slowly disappearing from orchards and gardens and unless the home owners come to its rescue it will be only a short time before this variety is lost. Do not confuse this "Old-Fashioned Red Indian Cling" Peach with the ordinary Indian Peach.

OLD-FASHIONED RED INDIAN FREE (17A)—The same as Old-Fashioned Red Indian Cling, except it is a freestone.

MAMMOTH HEATH CLING (18A)—Creamy white with delicate red blush; flesh white, slightly red at the pit; tender, juicy and sweet; valuable for canning and commands fancy prices in all markets. Clingstone.

KRUMMEL'S OCTOBER (19)—A magnificent Peach; the most prolific and best late yellow freestone. Ripens after Salwey, or six weeks after Elberta. Medium large, almost round, deep yellow with a dark carmine blush; very firm, fine texture.

A New Everbearing Peach

SUMMERLONG Pat. 1503

Now you can have a continuous supply of fresh peaches from July 20 through September all from one tree. Fruit is medium size, freestone, juicy, sweet and of excellent quality. Elberta type, color red-dish tinge with yellow flesh. Ideal peach for home use, pick the fresh fruit as it ripens, no waste! 3 to 4 ft. 7/16 to 9/16 at \$2.45 each.

NECTARINES

A smooth skinned Plum-Peach having flavor of both, sometimes called "Fuzzless Peach." Trees self fertile, vigorous and productive, thrives in all peach growing sections. Fruit large, handsomely colored, excellent quality. Flesh juicy, tender and sweet. Nectarines should be included in every planting. Variety: Hunter.

Keystone

RICH IN MINERALS AND VITAMINS

FRESH CUT HOME GROWN ASPARAGUS DELICIOUS, TENDER

Every home garden should have at least one row of asparagus. A few roots will supply an ordinary family. Easily grown, producing an enormous amount of wholesome food at small cost and effort. Once planted will last 12 to 15 years. A few thousand plants can be depended on to bring you quick cash in the early Spring. Requires deep fertile soil.

MARY WASHINGTON. One of the finest rust resistant types of asparagus, producing a heavy crop of large, tender, green tips early in the spring. Excellent for canning and freezing purposes.

NEW PARADISE. A new Giant strain Asparagus, a sport of the Mary Washington, large green stems. Opportunity for quick returns from Paradise are now greater than ever before with the increased demand for this crop. Especially suitable for both canning and freezing.

RHUBARB

MacDONALD RED. One of the best rhubarbs on the market, introduced from Canada. Giant size stalks, two to three times larger than common rhubarb, far more tender, delicious and sweeter. The bright red skin is so tender it needs no peeling. We recommend this variety if you want the finest in RED RHUBARBS. Plants seedless, healthy, vigorous and productive.

PRICES Strong No. 1 Divisions; 80c ea.; 3 for \$1.95; 10 for \$6.00; 25 for \$13.75.

CANADA RED. The reddest of all rhubarbs. Has large tender, juicy, stalks that are rich red all the way to the heart. Tender skin requires no peeling. A heavy producer can be used throughout the season.

PRICES: Large No. 1 Divisions; 90c ea.; 3 for \$2.25; 10 for \$7.00; 25 for \$16.25.

VICTORIA. An old favorite producing large tender red stalks of excellent flavor. Once planted lasts a lifetime.

Bonus Plants: You may select any item listed in catalog except Strawberries, Mums and Special Collections. Bonus plants must be figured at each rate.

(\$5 is maximum bonus allowed)

PLEASE NOTE: The only items that cannot earn Bonus are Strawberry Plants, Special Collections, Mums, June Budded commercial grade Peach Trees and special quotations. These purchases should be deducted from total order to determine Free Bonus due you. (Example, if order totals \$20 and \$5 is for Special Collections or Strawberries, you would be entitled to Bonus on \$15 and could therefore select free plants valued at \$1.50.)

Specify Free Stock on your order by marking "Free Bonus." If value of Free Bonus you select totals more than the Bonus to which the order entitles you, simply add the difference to your order. For example, if your Bonus amounts to \$3.00 and the Free Bonus you select totals \$3.75, simply add 75c to your regular order.

Bonus selections must accompany the original order or none will be sent, as all stock must be packed in one shipment, so please don't forget your Free Bonus as we WANT you to have it.

Should we sell out of some items, we reserve the right to change the Bonus, sending you similar stock of equal or greater value.

NOTE: Bonus values must be taken in Nursery Stock. We are sorry we cannot accept orders if Bonus is deducted as discount, due to the very small margin of profit on all items listed in this catalog.

HOW TO ORDER

THERE IS NO RISK IN MAIL ORDER BUYING BECAUSE YOU ARE PROTECTED BY OUR WRITTEN GUARANTEE

TERMS—Remittance in full with order, or if you prefer COD shipment, send one-third remittance with order, balance can then be shipped COD.

PRICES are net, subject to prior sale and change without notice f.o.b. our shipping point. No charge is made for packing. Orders are accepted without liability to us should injury befall the stock from hail, fire or causes beyond our control.

TRANSPORTATION—Orders are shipped by either Express or Parcel Post, depending upon weight and size of stock. On Parcel Post shipments (except Evergreens), we will advance the amount of postage and permit the customer to refund us the amount of cancelled postage on package; thus saving you the extra collection fees charged by the Post Office. See our generous Free Bonus offer above. Don't miss this opportunity to stretch your dollars.

NOTICE OF SHIPMENT—The day stock is shipped we notify you by mail.

MINIMUM ORDER—We regret \$3.00 is the minimum order we can accept due to the high cost of labor and packing.

HOW TO SEND MONEY—By Post Office or Express Money order, or personal check. If it is necessary to send cash, please be sure to register your letter as we cannot assume responsibility for money lost in the mail. Please do not send stamps as we use postage meter. Your order will be acknowledged the day it is received.

SPECIAL NOTICE TO COMMERCIAL ORCHARDMEN—Write for special quotations on lots larger than listed in this catalog. We also grow Peaches, Apples, Cherries, Pears, Plums, Prunes and Apricots by contract, scions and budwood furnished either by customer or by us. Write for details.

TERMS

GENERAL INFORMATION

CERTIFICATE OF INSPECTION—Issued by Tennessee State Entomologist certifying our Nursery has been inspected, and all plant material found to be apparently free of disease and pest, is attached to each shipment.

NON-WARRANTY—We make every effort to keep our stock pure and true to name and seldom have a report of plant material proving otherwise, but in the event any nursery stock or plants sold by us should prove untrue to name and purchaser should be damaged thereby, we agree, on proper proof, to replace such stock or to refund the purchase price, refunding or replacing to be at our option, except for such liability, we give no warranty, either expressed or implied, as to the quality of crop, growth or productiveness, and all stock, plants, etc., are sold and received with the agreement between the purchaser and ourselves that we shall never be liable for any amount greater than the purchase price.

FOREIGN SHIPMENTS—Minimum order accepted outside Continental United States is \$50.00. All shipments f.o.b. Cleveland, Tenn.

OUR MOUNTAIN WINTERS MAKE HARDY, HEALTHY STOCK WHICH THRIVES AND BEARS FRUIT IN NORTH, SOUTH, EAST OR WEST.

We are not located way down South where it does not get cold in the winter time. Hardly a winter passes that the thermometer does not drop to zero or below, we often have deep snows.

GRADING BY CALIPER AND HEIGHT according to standards established by American Association of Nurserymen. We grade all our trees both by height and caliper which gives well balanced stocky trees of proper height for the caliper.

OVER HALF MILLION SATISFIED CUSTOMERS BECAUSE . . .

1. WE HAVE SUPERIOR NURSERY STOCK grown under ideal soil and climatic conditions at prices you can afford to pay, sold direct from grower to customer. No salesman commission added to price of stock.

2. WE HAVE 60 YEARS REPUTATION BEHIND EVERY SALE. The nursery has been operated by the Fletcher family since it was established by General A. J. Fletcher in 1899, now operated by Leonard C. Fletcher. When you buy from us you buy with confidence, you may be certain we will still be in business when your trees come into bearing.

3. OUR VAST EXPERIENCE enables us to give you the highest quality trees at the lowest possible cost. We are able to give you all the popular old favorites as well as the new and improved ones we have tested and found worth while.

4. WE ARE CONSTANTLY STRIVING TO GIVE YOU BETTER VALUES and keep our firm worthy of your trust and confidence.

5. WE ARE MEMBERS OF: American Ass'n of Nurserymen, Southern, Western and Tennessee Ass'n of Nurserymen, National Mail Order Nurserymen's Ass'n and New York State Fruit Testing Co-op Ass'n, Inc.

WE GUARANTEE (a) that every tree and plant ordered from us will be received in good live planting condition. Any plant material that arrives in unsatisfactory condition will be replaced **ABSOLUTELY FREE**, transportation prepaid, provided we are notified within ten days from receipt of order.

(b) While losses from transplanting our sturdy Mountain Grown Nursery Stock are at a minimum, should any plant material fail to live in spite of careful handling both by nurserymen and planter, we will share the loss with our customer and replace any plant material, except trees sold at wholesale, that fails to live at one-half catalog price f.o.b. Cleveland, Tennessee, if we are notified not later than July first after planting.

The Newest and Best Varieties of TENNESSEE NURSERY Mountain Grown APPLE TREES

Plant Apple Trees for welcome shade, lovely blossoms in the Spring and
LOADS of delicious fruit.

ALL SUMMER (Everbearing). Produces from summer, through September, bearing early to late. Fruit is medium size, red tinge with slight stripe, excellent flavor. Is recommended for garden or orchard.

EARLY RED BIRD (1A). Earliest of all apples. Good size. Flaming scarlet red. Rich spicy flavor. Excellent eating and cooking apple. Trees extremely hardy. Vigorous grower. Bears young and produces heavy crop.

YELLOW TRANSPARENT (1B). Our most widely planted early commercial Apple. Hardy, early bearer. Fruit good sized, skin clear white to pale yellow in color. Flavor very good. An excellent cooking apple.

GOLDEN LODI (2). Same quality and flavor as Yellow Transparent but larger and more firm, ripening a few days later. This tree is proving to be one of our best early apples and is recommended as a commercial variety. A product of N.Y. Fruit Testing Association.

ANOKA (2A). The "Old Folks Apple." The Apple you have dreamed about! Originated after years of research, by the noted wizard, Prof. N. E. Hansen. A one-year-old tree sent to an Agricultural Experiment Station bore 26 good sized Apples the second year. Anoka not only bears early, it ripens early, has a wonderful flavor, juicy, and its color and size have eye appeal. Tree is somewhat dwarfish, which allows more trees for your space. If you have a little space in your yard, don't fail to include Anoka Apples in your order.

RED ASTRACHAN (2C). This is one of the most popular red apples for home orchards in the United States and Canada, not because it is best in any of its characteristics but because it is considerably above the average in all. Tree vigorous, upright, hardy and productive. Fruit large, smooth. Flesh white, crisp, juicy with agreeable rich acid flavor.

EARLY HARVEST (2D). A tremendous producer of medium to large, beautiful yellow apples. Tender, juicy, flesh with a luscious flavor. Fine for eating fresh and exceptionally good for cooking. A healthy tree that fruits in June.

RED JUNE (3). One of the most popular early red apples. This apple is much esteemed in the south and southwest as their best early apple. A profitable orchard fruit. Tree vigorous, upright, an early and abundant bearer. Fruit medium size, skin smooth deep red. Flesh white, tender, juicy sub-acid.

Old Fashioned Rusty Coat

RUSTY COAT (RUSSET). (21). We offer you again this season the true Old Fashioned Rusty Coat Apple, originated over 300 years ago, one of the oldest American varieties. This rough, tough skinned yellowish-brown russeted apple is known and loved by all. Flesh is yellowish-green, tender with pleasing spritely flavor. Fruit large, ripens late, in olden days was often kept until May.

PRICES: 2 to 3 feet 1 yr. \$1.25; 3 to 4 feet 1 yr. \$1.50; 4 to 5 feet 1 yr. \$1.75; 5 to 6 feet 1 yr. \$2.00. Supply Limited.

RED DUCHESS OF OLDENBURG (3B). Fruit large, striped, juicy and sub-acid; vigorous, abundant bearer. Recommended for commercial and home orchard.

NEW HOLLAND (Summer Champion) (4). Try some of these vigorous trees and see for yourself what a "Wonder" apple New Holland really is. This huge red apple of excellent flavor pleases every taste, flesh firm and juicy. Tree has proven to be a consistent and heavy producer. Ripens August.

ALL RED McINTOSH (8). Leads all other varieties in production and profits in Northern Apple areas. Bears young and annually. Fruit above medium to large, highly perfumed, brilliant crimson, sub-acid, high quality. One of best general purpose Apples.

CORTLAND (8A). This deep red apple resembles McIntosh. Excellent keeper, fine flavor. Popular in the New England States.

IMPROVED ALL-RED JONATHAN (9). One of our greatest commercial Apples due to its quality and productiveness. Adapted to home, domestic and foreign markets. Medium size, high-red color, flesh firm, crisp, tender, juicy of excellent quality and flavor. Same size, color and shape as regular Jonathan with the advantage of fruit coloring 2 weeks earlier.

BUY THE BEST *Improved* VARIETIES

CRAB APPLES

HYSLOP. Season September to October. Tree vigorous, very hardy. Fruit medium, yellow ground with heavy shadings of deep crimson and splashes of maroon with heavy blue bloom. Flesh fine, firm, yellow, astringent. Bears abundantly in clusters. Tree exceptionally ornamental.

HOPA. From early spring until late fall, this crab apple will be a delight to you. Foliage is bronzy red in the spring, before leaves develop, the whole tree is completely covered with magnificent fragrant pink flowers, followed by the prettiest tiny red apples that bejewel the tree during the summer. Unexcelled for making jelly. Hopa Crab is hardy and easy to grow.

TRANSCENDENT. Season September. Fruit medium to large; color brownish yellow with blush of carmine; flesh firm and crisp, yellowish, fine grained, very juicy, acid. Tree is vigorous grower. Hardy.

ELEYI. Admired by all for its gorgeous blossoms as well as fine crop of small crab apples. Priced 50c per tree above standard varieties.

GRIMES GOLDEN (10). Medium to large; bright yellow with pink cheek flesh fine grained, juicy, very pleasing, spicy flavor.

OLD-FASHIONED HORSE (10A). An old time favorite. Large, pale greenish yellow shaded with red; tender, juicy sub-acid. Tree very hardy; upright grower; bears early and abundantly.

GOLDEN SWEET (11). Highly esteemed for its honeyed sweetness. Unsurpassed for its flavor and attractiveness. Trees hardy, vigorous, thrifty and productive, bearing young. May be picked before ripening and stored for winter use.

YELLOW DELICIOUS (12). Continues to rank high among the leading apples. Famous for its excellent quality. Tree thrifty, dwarfish by nature, usually produces abundant crops while very young. Fruit golden-yellow; fine, firm textured flesh, having a combination of flavors hard to equal.

ALL-RED DELICIOUS (12C). THE WORLD'S MOST WIDELY PLANTED APPLE. Fruit large blood-red, coloring 2 weeks before the old Delicious, enabling you to pick and market earlier. Flesh fine grained, crisp and melting, juicy, with delightful aroma. Tree vigorous and hardy. Superior carrying qualities.

RED NORTHERN SPY (14). A favorite in Northern States, a large solid red apple, flesh crisp, firm, juicy, flavor rich, aromatic, mild, sub-acid, fine. Keeps through winter and late into spring. Tree vigorous, hardy, long-lived.

TURLEY (14B). Trees vigorous, productive, early bearing. Fruit large, skin smooth. Color bright attractive red, resembles Staymans. Flesh firm, crisp and juicy. Much in demand for cooking, storing or eating fresh. This wonderful all around apple with its large uniform fruit is recommended as a profitable commercial variety.

YORK IMPERIAL (16). A fine, hardy, large winter Apple. Bears regularly and heavily. Skin yellow and almost wholly covered with two shades of red. Fruit keeps and ships exceptionally well, flesh tender, juicy and aromatic, hangs well on tree.

RED STAYMAN WINESAP (17). Most profitable Apple ever grown in the fruit producing areas of the central states. Vigorous, hardy, spreading. Early bearer and very productive. Fruit medium to large size, round approaching conic, dull red; flesh yellow, firm, tender, juicy, sub-acid, aromatic. Splendid late keeping Apple.

ALL-RED ROME BEAUTY (Gallia Beauty) (17B). Also called Double Red, Blood Red and Solid Red. Our best seller for winter storage. Extra large, round shapely fruit with brilliant bright red color. Firm and fine texture, sweet, crisp and juicy.

WINTER BANANA (18). Fine, vigorous grower, early bearer. Medium to large, handsome golden yellow, shaped like a banana, with red blush; flesh fine grained, rich, sub-acid, aromatic.

YATES (18B). Fruit small; dark red with small white dots; skin thin and tender; flesh crisp, juicy, fine flavor. Fine keeper, and throughout the Cotton States regarded as the best all-around Apple for home use and marketing.

OLD FASHIONED VIRGINIA WINESAP (18C). One of the most widely known apples. Thrifty, hardy, young and regular bearer, unexcelled for cooking, jelly or eating fresh. Noted for its keeping qualities. Fruit medium size, dark-red, firm and juicy.

MAMMOTH BLACK TWIG (19). Excels Winesap in nearly every important point; better grower, harder, fruit larger, color a darker red; flesh firmer; flavor milder. A long keeper.

NEW DELCON DWARF APPLE. A natural dwarf, seldom exceeds 12 feet at maturity, producing loads of beautiful dark-red apples of highest quality and flavor. A cross between Red Delicious and Jonathan. Tested and approved by Missouri Experimental Station. Priced 50c per tree above standard varieties.

OUR DWARF FRUIT Trees Produce GIANT FRUIT

A new thrill for home owners with limited planting space, to grow and pick their own vitamin-packed tree-ripened fruit. Trees often **start bearing the first or second year** after planting. Our Dwarf Fruit Trees produce **fruit as large or larger than standard varieties.**

All varieties of Dwarf Trees are **delightfully ornamental** and small enough to plant among the shrubs or in tiny back yards, also ideal for new Ranch type homes.

May be grown in any soil or climate where standard size fruit trees grow.

DWARF APPLE TREES

Our Dwarf Apples, grafted on imported Malling root stock stay dwarf in size and seldom exceed 8 to 12 ft. in height. Trees require very little space and are usually loaded with apples of the finest quality, as large or larger than standard trees, begin bearing when very young. Varieties: All Red Delicious; Yellow Transparent; McIntosh; Courtland. For description see pages 7 and 8. Price: 2 year 3 to 4 ft. trees \$2.95 each; 3 for \$8.55; 5 for \$14.00; 10 for \$27.00.

DELCON. A NEW NATURALLY DWARF APPLE

Seldom exceeds 12 feet at maturity, producing loads of beautiful dark-red apples of highest quality and flavor. Tested and approved by Mo. Exp. Sta. A cross of Jonathan and Delicious. Price: 2 to 3 ft. \$1.20 each; 3 to 4 ft. 2 yr. \$1.60 each; 4 to 5 ft. 2 yr. \$1.75 each; 5 to 7 feet 2 yr. \$1.95 each.

DWARF PLUM

You will be delighted with these dwarf trees growing 8 to 9 feet tall at maturity, producing enormous crops of big, juicy, deep-purple full size fruit. Freestone, excellent desert quality. When cured the flesh is firm and meaty. Variety: Fellenberg.

Heavy 3 to 4 foot trees, \$3.10 each; 3 for \$8.85.

DWARF CHERRY TREES

Ideal for a small yard. Trees grow 6 to 10 ft. tall, branched low to the ground. Fruit large, juicy, excellent flavor, skin thin and tender. Unexcelled for pies, cobblers, preserves, freezing and eating fresh. Trees ornamental, become a solid mass of beautiful white blossoms in the spring. 3 to 4 feet \$2.95 each; 3 for \$8.55.

Varieties: The Great North Star and Brilliant New Meteor. See page 12 for full description.

See Page 32
For DWARF
TREE
COLLECTION

NEW Dwarf Peach Trees

We now offer PEACH TREES in Dwarf form, trees only 6 feet tall at maturity, producing loads of big juicy peaches as large or larger than standard varieties. Trees are ideal for landscaping, very ornamental when in bloom. May be grown successfully in the tiniest back yard or city lot. Trees usually begin bearing next year after planting. Varieties: Great Elberta, Golden Jubilee, Red Haven. For description see pages 3 and 4. Prices: Heavy 2 yr. 3 to 4 ft. trees \$2.95 each; 3 for \$8.55.

DWARF PEAR TREES

Now you can grow delicious pears in a small yard or garden. These remarkable trees seldom exceed 8 feet in height at maturity and produce a heavy crop of standard size pears of the finest quality. Usually bears first or second year after planting. They are ornamental for the lawn with their beautiful blossoms and foliage. Plant two varieties for cross pollination. Varieties: Bartlett, Clapps Favorite, Seckel and Duchess. (Duchess: Large size fruit, tender, juicy, ripens early fall. See page 14 for description of other varieties.) Prices: 2 yr. 3 to 4 ft. trees \$2.95 each; 3 for \$8.55; 10 for \$27.00.

DWARF SAPA PLUM

This Dwarf Red-Fleshed Plum produces an enormous crop of fruit, even in the coldest climates. Fruit firm, delicious, sweet and juicy, excellent for canning and shipping. Usually bears 1st year after planting. Its beautiful blossoms in the spring make it ideal for border planting. Price: 18 to 24 in. \$1.00 ea.; 3 for \$2.75; 2 to 3 ft. \$1.25 each; 3 for \$3.50; 3 to 4 ft. \$1.50 each; 3 for \$4.25.

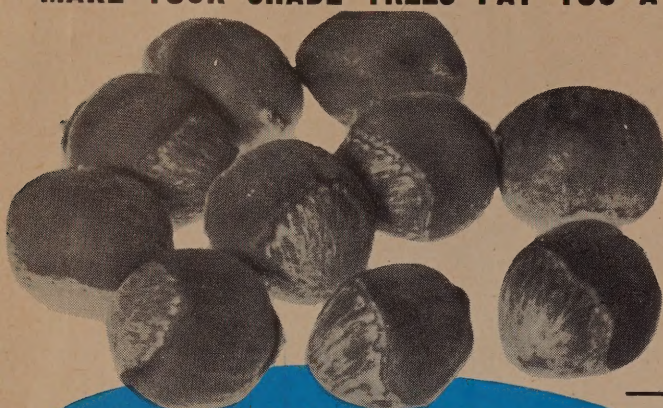

ORANGE QUINCE

A natural DWARF tree, seldom exceeding 8 feet. Produces large bright yellow fruit, flesh fine grained, excellent quality. Highly regarded for jellies and preserves. High in pectin. Price: 3 to 4 ft. trees \$1.90 each; 3 for \$5.40.

Plant HARDY NUT TREES

MAKE YOUR SHADE TREES PAY YOU A REWARD IN BUSHELS OF LARGE DELICIOUS NUTS

BEARING AGE FILBERTS

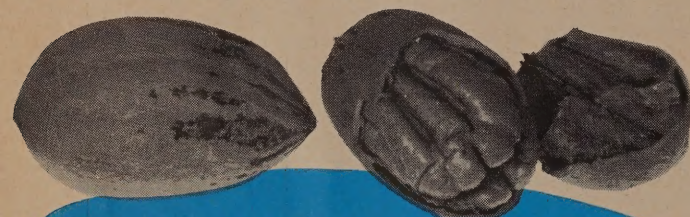

Note: Most types of nut trees should be cross pollinated. Therefore two or more varieties should be planted for best results. Butternuts, Black Walnuts and Heart Nuts (Japan Walnuts) will pollinate English Walnuts. For Pecan pollination see below.

Grow Blight-Resistant CHESTNUTS

CHINESE CHESTNUTS: We offer only the finest quality chestnuts from carefully selected strains, blight resistant. From these early bearing trees you will harvest a heavy crop of the finest sweet chestnuts annually, fully as delicious as our beloved old American Chestnut and slightly larger in size. These trees are planted commercially as well as being unsurpassed for their beauty as shade trees.

GILES

A NEW PECAN HARDY
IN NORTHERN STATES

A new pecan **RECOMMENDED FOR COLD CLIMATES** originating in Kansas. **USUALLY BEARS THIRD OR FOURTH YEAR AFTER PLANTING**, producing heavy crops of large, **VERY THIN SHELLED NUTS** with splendid kernel of high quality, fine flavored. Tree large, spreading, disease resistant. The usual life of a pecan is a century or more giving you a lifetime of unending pleasure. 3 to 4 feet \$4.25 each; 4 to 5 feet \$4.95 each.

Pollination: Pecans and Mahans are self-fertile, one tree will usually bear satisfactorily. For heavier crops plant two or more trees.

BEARING AGE FILBERTS AT UNHEARD OF LOW PRICES

AMERICAN FILBERTS (Hazelnuts). The Filbert trees we offer are three years old, well branched, heavy rooted, bearing age. They make a beautiful shrub attaining a height of 5 to 6 feet. In the Fall the foliage turns to bright scarlet and bronze at which time the bush is loaded with tender sweet, nutritious nuts much in demand. They thrive and produce heavily anywhere.

CHINESE CHESTNUTS

STUART. An old favorite that has been widely tested. Possibly the best known and most extensively planted of all Pecans. Will thrive as far North as S. Illinois. Being early, matures farther North than late varieties. Excellent nut with thin shell.

SCHLEY. This variety is placed by some at the head of the list. Thrifty, strong grower; nuts large, of fine flavor, well filled with meat; very thin paper-like shell.

DESIRABLE. Large nuts of delicious flavor. Excellent cracking and separating qualities. Early and prolific bearer. A popular favorite of 1915, lost for many years and recently re-discovered by the Department of Agriculture.

RARE NEW CHERRIES as well as TIME TESTED VARIETIES

SOUR CHERRIES

LARGE MONTMORENCY. Most extensively planted of all cherries. A large, dark red, midseason Cherry. Flesh firm and of excellent flavor. Recommended for commercial planting. Ninety per cent of all cherries frozen commercially and for home use are Montmorency.

EARLY RICHMOND. One of the most valuable and popular early sour cherries, unsurpassed for cooking purposes. This is the good old variety that yields such marvelous crops in the home gardens. Hardest of all varieties, uninjured by the coldest winters. Fruit bright-red, juicy and delicious.

NEW MONTMAMMOTH. (McClains' Improved Montmorency) An enormous red cherry often referred to as the world's finest sour cherry, originating in the Great Smoky Mountains. The parent tree producing 36 quarts of luscious cherries the third year after planting, trees usually bear light crop second year after planting. Very hardy, frost resistant, there is seldom a crop failure with Montmammoth. Trees are dwarfish and spreading, bulk of crop can be harvested from the ground, fruit often measuring 3 inches around. Due to its beauty and delicious tantalizing flavor, Montmammoth commands top market price. Unexcelled for pies, canning, preserving, quick-freeze and eating fresh when tree ripened. Montmammoth is rapidly becoming one of our most popular sour cherries.

LARGE MONTMORENCY

SWEET CHERRIES

Finest Known to Mankind

BLACK GIANT SWEET CHERRY. A huge sweet Cherry that is really hardy in sections where the thermometer often registers 30° below zero. Black Giant seldom misses a crop. Glossy blackish crimson skin, sugary sweet and delicious, firm and of supreme quality, juicy, very small seed. Far superior to any variety for pies, preserves and canning. Most delicious when eaten fresh from the tree. Young, heavy and regular bearing. Trees produce heavy crops at a very young age. Early.

BLACK TARTARIAN. An early cherry, large fruit, purplish black, flesh mild and sweet of excellent quality. One of the most popular sweet cherries for home use.

GOVERNOR WOOD. Light yellow marked with red. Flesh rich, firm and delicious. Vigorous and productive. Good shipper. Early.

YELLOW SPANISH. Pale yellow with reddish blush. Excellent for shipping and canning. Very popular mid-season cherry with sweet and tender fruit.

SCHMIDT'S BIGARREAU. A hardy black cherry of gigantic size, tree bears young, and heavily. Much in demand for its attractive color and delicious sweet flavor. Keeps well, making an excellent midseason shipper.

GOLD BOND (Yellow Glass). A New Gigantic Sweet Cherry. You will never know how good sweet Cherries can taste until you grow the Gold Bond in your own yard. When you pick your first Gold Bond Cherries, you will agree they are delicious. Each Cherry is a giant golden yellow morsel of goodness. The Cherries carry well and keep long. Trees are very productive and you often get a crop of fruit from three-year-old trees. Extremely hardy, has withstood 30 below zero.

NAPOLEON (Royal Ann). Yellow Cherry with light red blush, firm, juicy and delicious. Profitable for marketing, used for canning and Maraschino purposes. Prolific bearer. Midseason.

LAMBERT. One of the largest of all cherries. It is purple-red, juicy, firm with sweet rich flavor. Every year sees an enormous crop, the tree not only grows well but is very resistant against insect and fungus attack. Midseason.

EXCITING NEW DWARF CHERRY TREES

Grow farther North than other cherries, have also fruited heavily in test orchards in Tennessee.

BRILLIANT NEW METEOR. A new Dwarf cherry, a cross between Montmorency and a Canadian cherry. Hardy in extreme northern sections where other cherries cannot be grown. The tree is strong and vigorous, bears young, grows 8 to 10 ft. tall. The attractive bright red fruit is very large, skin thin and tender. Excellent for eating fresh, pies, cobbles, preserves and freezing. Self fruitful. Ripens mid-season.

THE GREAT NEW NORTH STAR. Very hardy Dwarf, will succeed farther north than any other cherry. A cross between English Morello and a hardy Siberian Cherry. Fruit large mahogany-red, skin tender, flesh juicy, meaty excellent flavor. Tree small, grows 5 to 7 feet. Very productive. Self fruitful. Ripens early July.

Pick Cherries from Bushes

The popular New Hybrid Bush Cherries produce an abundance of Fruit in the coldest climates.

DWARF HYBRID CHERRY Collection No. 37

- 1 Dwarf Nanking Bush Cherry, 3 to 4 feet.
- 1 Dwarf Sapa Cherry-Plum, 2 to 3 feet.
- 1 Dwarf Korean Bush Cherry, 18 to 24 inches.

All THREE for Only.....\$2.85

(Catalog Value \$3.85, You Save \$1.00)
Prices Net, Not Subject to Free Bonus.

NEW DWARF OKA CHERRY. One of the newest and best cherry-plum introductions. Ripens late July. Fruit one inch in diameter, very sweet, purplish-red all the way through. Dwarf trees hardy, bear young. Showy blossoms followed by full crop of fruit. 2 yr. 3 to 4 foot bushes \$1.80 each; 3 for \$5.25.

GOLD BOND

POLLINATION: Sweet Cherries fruit better if two or more varieties of Sweets are planted together. Sour Cherries are generally self fertile.

SWEET and SOUR CHERRY COLLECTION NO. 30

- 1 Black Tartarian (Sweet) 4 to 5 ft.
- 1 Yellow Glass (Sweet) 4 to 5 ft.
- 1 Large Montmorency (Sour) 3 to 4 ft.

All Three SELECT trees for ONLY.....\$4.35

Prices net, not subject to Free Bonus Plants.

KOREAN HYBRID BUSH CHERRY. Usually bears first year after planting. A true dwarf, seldom exceeds 5 feet in height. Korean cherries are suitable for ornamental planting as well as in the garden. They resemble the Flowering Almond with pinkish white blossoms in the early spring. Fruit borne in abundance are smooth, shiny, wine-red one-half inch in diameter, resembling the Montmorency Cherry. Fruit ripens late, good quality. 12 to 18 inch 80c each; 3 for \$2.25; 18 to 24 inch \$1.00 each; 3 for \$2.85; 2 to 3 feet \$1.25 each; 3 for \$3.60.

DWARF SAPA CHERRY-PLUM. This plum has long been a favorite for use in making a tasty jelly having a beautiful sparkling red color. This dwarf tree produces enormous quantities of superior rich, dark purplish-red plums that are, just as sweet as sugar, ripening the last of June. Usually bears first year, produces in coldest climates. It's difficult to believe a tree so small could produce such a tremendous quantity of fruit. 12 to 18 inch 75c each; 3 for \$2.10; 18 to 24 inch, \$1.00 each; 3 for \$2.75; 2 to 3 feet \$1.25 each; 3 for \$3.50; 3 to 4 feet, \$1.50 each 3 for \$4.25.

NANKING BUSH CHERRY (Prunus Tomentosa). Beauty plus delicious fruit. Produces such an abundance of fruit it takes but a few minutes to pick a quart or two. Bushes usually start bearing the first year after planting, the second year branches are bending with sparkling bright red cherries. Fruit fine flavor, unexcelled for pies, jellies and preserves. Remarkably showy flowers in the spring making it suitable to plant in your shrub border. 18 to 24 inch \$1.00; 3 for \$2.85; 2 to 3 ft. \$1.25; 3 for \$3.60; 3 to 4 ft. \$1.60 each; 3 for \$4.50.

PLUMS and PRUNES

For Quick Growth and Heavy Yields

American and European Varieties

MUNSON. The earliest of all plums to ripen, a hybrid seedling of Normand crossed with America. Ripens last week in June. Colors well, yellow, size large, good quality, tender, juicy and sweet.

STANLEY PRUNE. This new improved prune is considered to be the best for commercial planting and home use. Usually bears third year after planting. Ripens 10 days earlier than most varieties. Exceptionally productive, fruit large, deep bluish purple; firm and sweet. Introduced by the New York State Experimental Station. Freestone. Mid-season.

ITALIAN PRUNE (Fellenberg). An old favorite for commercial and home use, fruit deep purple, large, juicy and delicious. Fine for canning and drying.

ALL-RED PLUM. (Prunus Newport). Fruit is cling, medium size, bright red, tart, produces jelly and preserves of unexcelled quality. Tree beautiful, ornamental and hardy. Foliage, stems, branches and fruit are ALL-RED. Don't fail to include this plum in your order.

GOLD PLUM. Luther Burbank selected this variety from among twenty million native, hybrid and cross-bred seedlings. A dwarfish grower with slender limbs; one of the hardiest and strongest trees. The fruit is noted for its beauty and fine quality. A light transparent golden yellow color, covered with a lovely red blush.

SHROPSHIRE DAMSON (Improved). The finest of all Damson varieties of plums. Medium size, dark purple; fruit in great demand by processing plants for jam and preserves. Tree blooms late, bears early and is a good grower. Adapts itself to most any soil and climate. A leading commercial variety.

Oriental Varieties

BRUCE PLUM. Considered one of the best and largest red oriental plums, ripening early just after Mayflower peach. Fruit large, very firm, fine quality. Trees bear young and heavily. Excellent shipper. Fine for jellies, canning or eating fresh.

WICKSON PLUM. Largest of all Oriental Plums, a new and valuable addition to the Plum family, originated by Burbank. Tree medium to large, vigorous grower. Fruit, firm dark red over yellow background, having an unusual and pleasant flavor.

KELSEY PLUM. Tree is vigorous, well formed and productive. Fruit very large, attractive color, red over yellow; flesh firm with rich, pleasant aromatic flavor. One of the first oriental plums introduced into America. Recommended for planting south of Washington and Baltimore.

ABUNDANCE. One of the most popular oriental varieties. Fruit light golden yellow, overspread with bright cherry red; large oblong, tapering to a point. Flesh light yellow, melting, highly aromatic. Tree rapid grower, bears young and early. August.

BURBANK. The all time early favorite. Fruit large, purplish red. Flesh deep yellow, sweet with an unusually agreeable flavor. August.

RED JUNE. An early oriental plum, ripening before Abundance. Blooms very late. Fruit medium to large; deep red. Flesh lemon yellow, aromatic and sweet. Tree large, vigorous, hardy and productive, fruit resistant to Brown Rot and Curculio.

METHLEY. A recent introduction that is much in demand due to its fine quality and handsome appearance. The fruit is medium to large, reddish purple in color. Flesh is red, juicy, sweet and of distinctive flavor. The tree is a vigorous, upright grower; does well in most every type of soil and is a regular and heavy bearer.

POLLINATION: Most American and European plums are self-fertile but will produce better when interplanted with other varieties. All Oriental varieties need cross pollination. Abundance is considered one of the best general pollinizers.

BURBANK PLUM

BLUE DAMSON PLUM

MOREPARK APRICOT

Jelly Makers Collection No. 48

Line your pantry shelf with sparkling jellies and jams.

- 1 Damson Plum, 2 to 3 feet

APRICOTS

SCOUT APRICOT. Be the first to grow big yellow, delicious apricots in your neighborhood. Scout is the hardiest and most productive of all apricots; may be planted almost anywhere in the United States. Trees bear at a very early age, ripening before plums. Fruit has thin skin, pleasing flavor, color gold with red blush.

EARLY GOLDEN. A new variety possessing a fine flavor. Skin is smooth, lustrous and pale orange in color. Medium to large in size. Makes an excellent variety to plant with Morepark.

MOREPARK. The most widely planted of all commercial varieties. Fruit is large, deep yellow, with a red cheek; freestone. Flesh tender, juicy and sweet; good for canning and drying. Tree dwarfish grower. Mid-season.

POLLINATION: Apricots require cross-pollination and should be interplanted to insure satisfactory crop.

Start Right by Planting Fletcher's Trees for Better Results

TENNESSEE NURSERY PEARS are Delicious and Easy to Grow!

AUTUMN PEARS

BARTLETT. The leading commercial and canning pear. Fruit is large, flesh tender and juicy, with a delicious musky flavor. Golden Yellow color on the sunnyside. The trees bear early, a very vigorous, erect grower, ripens September.

LINCOLN. An old favorite originating in Illinois in 1835, is being grown more and more, particularly in the midwest because of its superlative quality and because it can withstand cold and heat, and is blight resistant. Fruit medium size, firm, mighty good eating and good for canning. Ripens late August and September.

KIEFFER. An old favorite, a large golden yellow pear tinged with red. A strong grower, highly blight resistant. Planted in more orchards than any other pear. Has a place in all local markets and roadside stands. Excellent for preserves and canning. Ripens latter part of September.

SECKEL. Called the Sugar Pear because of its sweet, delicious flavor. Fruit is not large but the highest quality. Ripens in late summer. Bears young and heavily. Blight resistant.

EARLY HARVEST. Bears good crops early and annually. Fruit medium size, greenish yellow small dots with brownish red checks. Flesh white, fine grained, melting, excellent. Always finds a ready sale in markets. Ripens August, September.

NEW ORIENT (Orient Pear—Blight Resistant). A new introduction from Tennessee Experimental Station. The result of crossing Chinese and European strains, producing a **blight resistant Pear of excellent quality.** The trees are large, vigorous, bearing enormous crops and require little pruning. Blooms several days later than Kieffer. Fruit large, round, yellowish background with red blush, often 3 1/2 inches in diameter, ripening in mid August. Flesh creamy white, of good texture, juicy and melting, mild flavor. The fruit keeps well in storage. Recommended in areas where fire blight and leaf spot are prevalent.

HELPFUL PLANTING

GUIDE **FREE!**

With every order, we send Free a 16-Page Planting Guide. It

tells in a clear, simple way how to plant so that even if you have never done any planting, you can have success. It also explains how to prune, water, care for plants over winter, how far apart to plant, etc.

Kieffer
Pear

NEW

BLIGHT-RESISTANT PEAR INTRODUCTIONS

Our new blight resistant pear will supply the Southern markets with fruit whereas in the past only shipped in pears have been marketed. These new varieties all blossom mid-season or later escaping late spring frosts and should be included in every planting. Supply limited.

DABNEY. A cross between Seckel x Garber. Tree semi-dwarf producing loads of fruit. Fruit medium size, sweet, subacid, tender, juicy, more melting than Bartlett. Ranks high as dessert fruit, ripening early August. Skin thick, smooth, waxen, greenish color with russet spots.

AYRES. A cross of Garber x Anjou. Fruit golden russet, rose blush, numerous dots. Skin thick, flesh white tinged with yellow, melting, juicy, sweet, subacid, delicious for desserts or canning. Ripens mid August or early September.

HOSKINS. A cross between Seckel x Faulkner. Tree large, vigorous, spreading. Fruit medium, light yellow with russet blush and conspicuous dots. Flesh white tinged with pink, fine grained, tender, melting and juicy. Flavor subacid, good for desserts and canning. Pears picked early Oct. may be kept until Christmas.

MOORE'S. This pear has attracted attention as a Fall and Winter variety, a cross of Duchess x Faulkner. Tree large, vigorous, upright. Fruit picked in September may be ripened from October into December. Fruit attractive, large, greenish yellow with golden russet dots. Flesh yellowish-white, crisp, subacid, tender and juicy of excellent quality, rates high for both desserts and canning.

COPE'S SEEDLESS PEAR

NO SEED
NO CORE

A new fruit sensation. A pear that has no seeds and no core. Trees heavy producers, vigorous and hardy. Fruit large, golden-yellow with a blush. Flesh is tender, sweet, juicy and delicious, fine to eat fresh and ideal for canning as it has no seeds or core. A 5 year tree has been known to produce 3 bu. of pears. Ripens evenly without softening at center, five days after Bartlett. To keep the strain Seedless avoid cross pollination with other pears. Trees are self fertile but will produce more fruit if two or more trees are planted.

FIGS

A HEALTH FOOD THAT SHOULD BE IN EVERY GARDEN

Figs are easy to grow and are highly recommended as a health food. They thrive in any type soil and are hardy in the Central and Southern States where the temperature does not go below zero, however protection should be given the first and second year in colder regions.

BROWN TURKEY. Very prolific, of dwarfish growth. Fruit medium to large, color coppery-brown; flesh white or slightly amber colored, excellent quality. Midseason to late.

CELESTIAL. Widely planted in the southeastern Fig area. It can be grown where less hardy varieties fail. Fruit, medium in size, skin violet, flesh white to rose, firm, juicy, sweet and of excellent quality. Makes large trees, begins ripening in June and continues two months, very desirable for canning and preserving.

ALL STATE EVERBEARING FIG

An everbearing variety that has proven exceptionally hardy, grown successfully in many northern states, with slight protection. Should severe winters kill the tops the bushes will sprout from the roots and from these sprouts figs can be produced the same year. Fruit very large, light brown with firm, sweet flesh of excellent quality. Begins fruiting in July and continues until Fall. Trees bear early and are very productive. Recommended for preserves, jams, canning, drying, or to eat fresh.

IMPROVED BLACK MISSION—Fruit large, dark-purple to black with an overlay of amber at their base. Excellent quality and flavor. Begin bearing in early to mid-July and continue until cold weather.

GRAPES RICH IN VITAMINS

Grapes are easy to grow and require very little cultivation. May be trained to cover outbuildings, arbors and summerhouses. They produce early, bearing abundant crops of fruit so rich in vitamins and minerals necessary in our daily diet. May be eaten as fresh fruit, juices, jellies or jams. Plant Grape vines today for better health and big profits tomorrow.

Plant America!

BEST LEADING VARIETIES

AGAWAM. Red. An old favorite. Most widely planted of the standard red varieties. Its berries are unusually large, dark red, firm, rich in juice and piquant in flavor. The vine is particularly vigorous, ripens a little after Concord.

BETA. Black. Wine Grape. A universal favorite. This somewhat new Grape is a cross between the best tame and wild varieties. It is particularly good for conserve, juice or jelly, because of its interesting wild Grape flavor and somewhat tart tang. Beta is the hardest of all Grapes, exceptionally satisfactory for far northern climates. Its sturdy growth and heavy foliage make it especially desirable for arbor and semi-ornamental planting. Early.

CACO. New red Grape. This newly developed red Grape is fast becoming a favorite of all for the home vineyard. A cross of Concord and Catawba, it has inherited the fine characteristics of each. It is by far the most bountiful of all the hardy Grapes, yielding astonishing harvests—large bunches of immense, gleaming Grapes, deep rich red, and amber colored. Their flavor is exceptional—full, sweet, wine-like and refreshing. Ripens in September. Highly recommended.

CATAWBA. Red. Wine Grape. Commercial growers consider this the pick of the red Grapes. Last to ripen, it gives a long season of large, round berries, particularly sweet and sugary. They ripen to a dark, coppery tone, most attractive.

CONCORD. Black. An old favorite. Concord still maintains its place as the most profitable crop Grape in the United States. Whether for market or home use, Concord should be the backbone of your planting. It is thrifty, productive and disease resistant. It matures early, keeps well, ships well, and always finds a ready sale. Big, wide shouldered bunches of bluish berries of sweet, delicious flavor, unrivaled by any other variety, preferred for jam, jelly and conserve. Midseason.

DELAWARE. Red. Popular wine and table Grape. The standard of excellence. Bunch and berry medium, compact; flesh juicy, very sweet and refreshing. Ripens with or before Concord. Vines very hardy and productive; a slow grower, requires rich soil, good culture and close pruning.

DIAMOND. White. One of the hardest, most productive and vigorous of the white varieties. A splendid midseason Grape. Berry is rich, sunny, yellowish green, big, plump, full of sweet flavorful juice, and almost free from seeds. Desirable for both home and market.

It's Not A Farm Home Without Fruit

FREDONIA. Each year this new Grape is becoming more popular and is a true companion to the famous Concord. Ripening some 15 days earlier, it is popular in the Grape-growing sections. A juicy, delicious black Grape, vine vigorous and productive; flesh is solid and the berries do not crack. A fine shipper.

LUCILE. The Leading Red. We consider this one of the most beautiful and outstanding hardy Grapes. The berries are wine-red in color, very large, rich and sugary. Leading horticulturists and Experimental Stations claim it has no equal for home use. Medium early.

MOORE'S. Black. This might be called an early Concord; similar to it in appearance and quality, but ripening two weeks earlier. Most reliable of the very early varieties, vigorous, healthy, bearing heavily. The vines grow increasingly productive as they attain age. The bunches are good size; the berries big, deep, purplish black, have a sweet delightful flavor.

NIAGARA. (White.) The "Concord" of the white Grapes. Most widely known and usually best liked of this class. Bunches are somewhat larger than Concord, greenish tone, which turns pale yellow when fully ripe. Skin is thin but tough, making a good shipper. Popular with vineyardists and amateurs North and South. Midseason.

ONTARIO. White. Produces large, compact clusters of good size and wonderful flavor, strong and hardy. Another origination of the New York State Experiment Station. A promising variety. Very early.

PORTLAND. A new Grape. The earliest known Grape. A new white Grape developed in Fredonia, New York. Ripens earlier than any other known Grape, which permits its being planted over a wide range of territory. Berries large, and have that beautiful amber color like Niagara. All the truly good qualities desired in a Grape are incorporated in it. Quality excellent—equal to the Niagara and other later Grapes. It contains much sugar and can be eaten before it is fully ripe. Vine hardy and productive. This new Grape will please you.

SHERIDAN. Black. A new Grape of recent development. Ripens one week later than Concord, which it surpasses in flavor. Bunch and berry large. One of its most valuable characteristics is its excellent keeping qualities.

URBANA. A new hardy variety with European Grape qualities. This eastern Grape has the meaty fruit and the fine flavor of California varieties, yet you can grow it in your own garden. Both the bunch and berries are large and meaty. Very sweet. Good keeper. Makes a clear, bright red jelly of excellent flavor. Can be grown successfully south of the Great Lakes. Season one week after Concord. We recommend this variety very highly.

WORDEN. Black. A seedling of Concord which ripens about 10 days earlier. It bears bunches and berries considerably larger, and is considered tenderer and richer in flavor. Particularly good for the home garden because it is strongly immune to fungus diseases. Wordens fill the gap between Moore's Early and Concord.

NEW STEUBEN

A new creation of the New York Experiment Station. Huge, perfectly formed, long, slender clusters of blue Grapes are produced on extremely hardy vines producing a full crop after 20 below zero. Fruit **outstanding quality**, tender, melting, sweet having a delicate perfume-like flavor. Ripens a few days before Concord, keeps well until Christmas. No spraying necessary, it has been found to be free from rot and mildew. The **greatest blue grape ever grown**. Supply limited.

Jumbo	1.50	4.00	12.50

INTERLAKEN GOLDEN SEEDLESS. Newest of the California seedless introductions. (Thompson Seedless crossed with Ontario). Rich golden yellow flesh, crisp, solid, sweet, refreshing tangy flavor. Ripens 20 to 30 days before Concord. Vigorous, free from disease, hardy to 15 below zero.

	Each	3 for	10 for
2 Yr. No. 1.....	\$1.25	\$3.45	\$11.00
Jumbo	1.75	4.95	15.00

Now You Can Grow the New Hardy California-Type Grapes

NEW SENECA SKINLESS GRAPE

Seneca is the newest of the California-type Grapes and has the important feature of an edible skin. Fruit golden yellow, with firm juicy meat; flavor sweet, melting and delicious. Vine vigorous and productive; hardy wherever other Northern Grapes will grow. Available in limited quantities only.

GOLDEN MUSCAT

A new hardy California Muscat-type Grape which may now be grown in almost every part of the United States. One of the finest flavored Grapes grown. Color rich golden yellow, with fine muscat aroma; fruit large sweet and meaty. Ripens ten days after Concord. Very productive. For best results apply a good commercial fertilizer each spring.

Concord Grape, 1 yr. Medium grade 10c each

MUSCADINE TYPE GRAPES

The life span of muscadines is almost unlimited. They grow luxuriantly from Delaware to the Gulf and West to Texas. They have a distinctive flavor, unexcelled for making juice, wine, marmalades, jellies and jams. Ripens from August to November when other fruit are scarce, bringing high market prices. We now offer many NEW and IMPROVED bronze and black varieties. Plant one Tar Heel or Willard for each nine muscadine vines to insure full crop.

BRONZE MUSCADINES

YUGA. A fine new bronze variety, produces large clusters of medium size light bronze fruit. Flesh juicy, tender, sweet, excellent flavor, skin thin. Fruit often hangs on vine until frost. Ripens medium-late. Sterile.

NOVEMBER. A new bronze variety recommended for extending the grape season. Fruit medium, sweet, juicy, tender with fine foxy flavor. Very productive. Ripens late. Sterile.

SCUPPERNONG. One of the best known bronze muscadines. Fruit medium large born in small clusters. Skin thick, reddish-bronze, flesh green, juicy and sweet having pleasing taste and aroma. Ripens medium-early. Sterile.

BLACK MUSCADINES

HUNT. The best all-purpose dark muscadines. Fruit large, black, born in clusters, medium to thin skin, flesh dark, very sweet and juicy, pleasing flavor and aroma. Excellent for juice, wine, jelly, jam and eating fresh. Highly recommended for both home and commercial vineyards. Ripens early. Sterile.

DULCET. One of the best varieties for eating fresh. Ideal for home vineyards. Plants vigorous and productive. Fruit medium size, reddish-purple, born in large clusters, skin thin, flesh sweet, excellent quality. Ripens mid-season. Sterile.

JAMES. An old standby. Fruit very large, black, juicy with excellent flavor and quality. A regular and heavy bearer. Mid-season.

NEW SELF-FERTILE CROSS-POLLINATING MUSCADINES

The most important feature of the Tar Heel and New Willard is the fact they bear fine quality grapes, are self fruiting and will also pollinate other sterile varieties, eliminating the need of planting the non-fruiting Male muscadine. Vigorous and productive. Experimental Stations report 6 tons per acre. Ideal for small city gardens as only one vine need be planted. Recommended for commercial vineyards.

TAR HEEL. Black fruiting male. Good quality, jet-black. Vigorous, heavy producer. Desirable for its fruit as well as pollinating qualities. Excellent for wines, jellies, jams, grape juice. Ripens Sept. 20th.

WILLARD. Bronze fruiting male. Also cross pollinator. Vigorous, prolific. Bronze fruit medium size, grows in large clusters, flesh tender and sweet. Ripens Sept. 5th.

SPRING BEARING VARIETIES

Virus-Free Plants

BLAKEMORE

A LEADING COMMERCIAL BERRY

Blakemore has proven to be one of the finest of all early shipping berries. It is a free plant maker and an abundant bearer, the fruit averages large and retains its bright attractive red color even after being picked several days. It ripens a few days earlier than Premier. Foliage is healthy and vigorous. Plants hold up well during a drought. Berries firm and unexcelled as a long distance shipping berry, preferred by all Strawberry processing companies.

KLONDYKE

EXCELLENT FOR FREEZING AND EATING

An old favorite widely planted in the south where it has a proven record of success for years. Early bearing on vigorous upright growth. Klondyke is a real money maker. Handsome, large, firm berries, excellent flavor, good shipper.

SENATOR DUNLAP AN OLD FAVORITE

Ranks among the oldest and most popular strawberries. This variety withstands cold winters and hot dry summers being a favorite in the central and northern states. Fruit good quality, bright-red, firm and sweet. Bears a few days after Premier.

PREMIER THE FROST PROOF BERRY

Possibly the world's greatest strawberry, a real money maker. One of the best early varieties ever introduced, adapts itself to most all types of soil and climatic conditions whether it be North Carolina or Illinois. Thrifty, disease free, good plant maker almost frostproof. Its deep roots enable it to withstand dry hot weather maturing a full crop when other varieties fail. Ripens early when demand is greatest over two or three week period. Berries are firm having an attractive bright-red color and good quality.

FLORIDA 90

VIGOROUS AND PRODUCTIVE FOR THE DEEP SOUTH
A fine new strawberry which has already taken over half the strawberry acreage in Florida. Florida 90 berries are larger than Blakemore, long and pointed, juicy, red clear through. Plants vigorous and very productive, excellent shipping qualities. A leading commercial berry which has been well received on northern markets.

KLONMORE

A FAVORITE IN THE SOUTH

An excellent berry, well adapted to the lower Gulf States, Florida and the East Coast of Georgia, a cross between Klondyke and Blakemore. Good quality, firm shipper.

MISSIONARY

EXCELLENT FOR SHIPPING AND FREEZING

One of the leading southern berries due to ability to make plants on light sandy soil as well as on loamy soils. Berries medium size, attractive dark-red color, good flavor. A leading commercial variety in the south.

NEW POCAHONTAS

PRODUCES BERRIES SOONER THAN MOST VARIETIES

Pocahontas is outstanding because of its ability to produce a satisfactory crop of berries the following spring from plants set in the fall. It is one of the most vigorous Strawberries we have ever seen. Originated at Beltsville, Md., a cross of Tennessee Shipper and Midland recently released by U.S.D.A. Test plots produced 11,376 quarts per acre. Berries ripen about one week later than Blakemore. Fruit is attractive, firm, large size, glossy vivid red, flavor tart and good. Ideal for freezing or shipping. Don't fail to plant this new variety.

ROBINSON

RANKS AMONG THE LARGEST STRAWBERRIES TODAY

Ranks among the largest Honey Sweet Strawberries today. Productive under unfavorable weather conditions. Thrives on almost any type soil. Excellent plant maker. Leading commercial variety due to shipping qualities. Recommended for East Central and North. Ripens 10 days after Premier.

TENNESSEE BEAUTY

TEST PLOTS PRODUCED 12,700 QTS. PER ACRE

One of the most beautiful and most productive of all varieties as well as being the most profitable. Berries are excellent quality, average medium to large in size. Tenn. Beauty is one of the best berries for fresh markets as well as the best for freezing and processing. Highly recommended for commercial planting, it is firm enough to ship well. Thrives in all the southern and middle states as far north as central Pennsylvania and the coastal areas of New York and New England.

EVERBEARING STRAWBERRIES

NEW BRILLIANT—Pat. No. 1183

RIPE BERRIES IN 6 WEEKS

This new Everbearing Strawberry has won all records for BIG YIELD and PERFECT BERRIES. Test plots produced 7,000 quarts per acre, 2,000 quarts more than any other variety tested. Brilliant is very hardy, will thrive on thin sandy soil, heavy clay or raw muck. Their vigor is almost unbelievable producing steadily all summer and fall. Berries are brilliant glossy-red clear through, rich and tangy in flavor, lacking in acidity so common in everbearers. Produces berries just a few weeks after plants are set. Get the most from your soil by planting Brilliant this spring.

GEM

PRODUCES TWO FULL CROPS EACH YEAR

An old favorite bearing two full crops each year. Fruiting over 130 days. Commercial growers report 100 crates per acre, plants healthy, vigorous and drought resistant. Berries firm, sweet and of excellent quality. Makes new plants freely.

RED RICH—Pat. No. 993

UP TO A QUART OF BERRIES PER PLANT

You just pick and pick and pick these luscious berries from June right through 'til frost. Folks who say an everbearer isn't sweet should taste Red Rich. They're chockfull of real honey-sweet goodness. They're deep red through the core. Solid and firm. Frost resistant. Tops for freezing, too! Delicious and attractive when served. A leading midwestern university reports Red Rich the best of 29 everbearing varieties tried. The plants are so tall and full that you can use them as a beautiful garden border.

STREAMLINER
THE PERFECT EVERBEARER

The perfect Everbearer. Berries rank among the largest of any everbearing variety. Yield heavy crops of honey-sweet brilliant red fruit of enormous size over a long season. Has been known to begin bearing only 50 days after Spring Planting.

20th CENTURY

A FIRM HONEY-SWEET BERRY

Highly recommended by all Experimental Stations. Second only to Red Rich. Superior in size, quality and vigor to other everbearers. Exceptionally large, bright red berries of fine texture and delightful flavor. Begins fruiting 60 days after planting and continues bearing heavily right up to frost.

SUPERFECTION

HARDY AND CONSTANT IN FRUITING

The most vigorous grower of any everbearing variety, producing heavily in summer and fall. It has the hardness of Gem and is just as constant in fruiting. Excellent flavor and color. This berry should have a place in every home garden. Recommended for commercial planting.

Tennessee Nursery's

New

Virus-Free

Strawberry Plants

WILL SAVE YOU MONEY

The greatest advance ever made in the Strawberry Industry. Original stock developed by the U. S. Dept. of Agriculture in cooperation with the State Dept. of Agriculture, now available for the first time in quantity lots in all leading spring bearing varieties. Order early to avoid disappointment. We will reserve plants and ship when instructed.

WHAT VIRUS FREE means to you—

- Plants are more vigorous.
- Increased yield.
- Larger fruit.
- Bear over a longer period of time.
- Produce more runners.
- Require less plants per acre.
- Longer life.

Everbearing BLACKBERRY

(New Tree Form)

The newest Everbearing Blackberries in tree form. Produces enormous crops from June through August. Blooms late, escaping injury from frost. Berries are large, sweet and excellent quality. Plants strong, sturdy and disease resistant. These small tree like bushes reach a height of six to eight feet and are highly ornamental. They may be interplanted with shrubbery with excellent effect. These Blackberries have tremendous commercial possibilities as they ripen and are ready for market long before others are ripe. Five plants in the smallest size yard will produce enough berries to keep your family supplied with Blackberry Cobbler throughout the season with some left to can.

GROW Fine Flavored BERRIES From Tennessee Nursery

Giant Thornless BOYSENBERRY

Our Leading Berry Vine Producing as Much as 6 Tons Per Acre
May Be Grown Successfully North or South

Combining the flavor of the Loganberry, Blackberry and Raspberry. Bears ten days to two weeks earlier than its parent (Thorny Boysenberry), thus insuring top market prices. Has produced up to six tons per acre. The berries are giant size, two inches or more in length, color purplish wine; unexcelled for use as fresh fruit, canning or for quick freeze as they hold their natural flavor to a remarkable degree. Their sensational, satisfying taste is something you will long remember. Plants are entirely thornless, bark smooth and green, resem-

bling a grape vine, with shoots from 15 to 20 feet long, easy to pick and handle. It is a vigorous grower and should not be planted closer than 6 feet apart. Fruiting season lasts about two months, longer than most vine berries. It is not unusual to pick 20 baskets of berries from each plant the second year. Have been grown successfully with some protection where temperatures fall as low as 10 degrees below zero. No other berry has ever been received so enthusiastically, or planted so widely. Plants especially resistant to drought and disease. July.

New Thornless Evergreen BLACKBERRY

Be the first to grow the New Thornless Evergreen Blackberry. This plant is a native of Europe, sometimes called Oregon Everbearing Blackberry. In mild climates the thornless canes do not die down but live on from year to year, in such climates the leaves stay green the greater part of the winter. Fruit black, medium size, having good sweet flavor, excellent for eating fresh, canning or freezing. Ripens from mid-August to frost when no other berries are on the market commanding highest prices. Plants vigorous, thrives in all blackberry sections.

Blackberries for BIG Cash Returns

Our plants are heavy fruiting strains. Turn your waste land and fence rows into profit. Blackberries produce from 800 to 2,000 quarts per acre commanding premium prices.

NEW EBONY KING—THE GREATEST DISCOVERY IN 30 YEARS. We recommend that you try this new hardy Blackberry, guaranteed to bear large luscious berries year after year. Extensive tests have proven it disease resistant, self fertile, no sterile plants, upright grower, very hardy having withstood temperatures of 22 degrees below zero. First berries to ripen producing enormous crops of large, jet black, nectar sweet berries of finest quality. Highly recommended for commercial planting and home use.

HEDRICK. A new introduction from the Geneva, N.Y., Experimental Station. Berries are large with sweet rich flavor having no core. Subacid when dead ripe. Canes hardy, vigorous and productive. Mid-season.

NEW Red Leaved Peach

BRIGHT RED FOLIAGE

EDIBLE FRUIT

DECORATIVE LAWN TREE

Bright red foliage appears early in the spring, changing gradually to deep maroon towards fall. Deep rose blossoms contrast beautifully with the colorful foliage. This sensational tree produces a full crop of small perfectly rounded Peaches, about 1½ inches in diameter. Fruits have an over-all red color slightly spotted, and ripen quite late.

3 to 4 feet.....	\$1.25 each		

New Everbearing September—Giant Size

The new everbearing red raspberry introduced by N. Y. Experimental Station, a raspberry that will produce an abundant crop in June and a crop of equal size in September. Fruit ripens earlier and is larger and better quality than any other raspberry. Ripens 2 to 4 weeks ahead of other varieties in the fall. The firm, bright-red berries have exceptionally fine flavor. Plants vigorous and disease resistant.

LUSCIOUS BERRIES—Use them for jellies, sauces, & pies

RASPBERRIES

New and Improved for Home and Market

Fill your deep freeze unit or frozen food locker with delicious frozen berries. Home grown fruits always taste better. Berries retain their fine flavor when frozen better than most other fruit.

LATHAM (Red). The most popular of all Raspberries for commercial and home planting. Production unsurpassed by any other variety. Mosaic free and hardy, commands highest market prices due to its brilliant red color and fine flavor. Ripens early. Berries firm, excellent for shipping, canning and freezing.

ST. REGIS EVERBEARING (Red Raners). The old standby of Everbearing Raspberries. The outstanding everbearing variety. It gives a crop of fruit all summer and autumn, fruiting on the old canes in generous quantities until late in August. By this time berries begin to ripen on the young canes and continue until late in autumn. Berries are a bright crimson of large size and of surprising quality; sugary with Raspberry flavor. This dependable everbearing Raspberry is without an equal. The spring crop ripens before other varieties and in the South, where it is grown extensively, it yields a very heavy early crop and a few berries in the Fall. A fine market berry for all sections.

INDIAN SUMMER (Red Everbearing), Berries are large, somewhat conical and slightly irregular in shape; medium red in color and of high quality. Plants are hardy and vigorous.

CHIEF (Red). Best extra early. A very popular early variety. Offspring of the famous Latham. Has proven hardy, disease resistant, a heavy cropper of excellent quality and a good shipper. Berries large, bright red. Ripens ten days earlier than Latham, bridging the gap between Strawberries and Raspberries.

SODUS (Purple). An excellent berry for home use, delicious for dessert, canning, preserves, jelly, etc. Berry very large and juicy, is easily grown and very hardy; adapted to cold and dry weather, does not have many briars, and yields heavily.

GOLDEN QUEEN RASPBERRY

The Sensational New Golden Queen Raspberry A Real Treat for the Taste

The new yellow Raspberry is a cross between the red Raspberry and the black Raspberry. It is both a novelty shrub and a great fruit producer—the berry being of a rich golden color of medium size. Its flavor is entirely different from any berry grown — a blend between the red and black Raspberry, a real taste treat. In many cases it is grown in preference to the red or black Raspberries, because of its sugar-sweet flavor. The berry when fully ripe is a rich golden yellow. It is truly a novelty shrub for your garden—the most unusual feature of this new variety is that after the first frost the canes will turn a rich yellow color, which is very outstanding during the winter months. The fruit may be eaten fresh, canned or frozen. Select Plants.

NEW LOGAN (Black). The best dependable early black Raspberry grown, holds up well through drought. In some localities where it has been grown for the past few years it has almost displaced the other standard varieties. Berries are as large as the Cumberland, bears as heavily and ripens a week ahead of Cumberland. This gives the grower a chance to make some really good money. Very resistant to Mosaic and other Raspberry diseases.

CUMBERLAND (Black). The Cumberland continues to be the universal black Raspberry. Its popularity with the growers is unchallenged. Cumberland has come through the years and on its record stands as America's leading black Raspberry. It is the choice of the commercial growers in the central and northern regions. One of the largest of the blackcaps. Plants are healthy, vigorous growers, throwing up stout, well-branched canes that produce immense crops of magnificent berries. The fruit is large and holds up well during the picking season; very firm and rates as one of the most delicious of the Blackcaps.

NEW IMPROVED BLUEBERRIES

PROFITABLE • DELICIOUS

Select Bearing Age Plants at Reasonable Prices

**More Profit
Per Acre Than
Any Other
Small Fruit**

GIANT IMPROVED BLUEBERRIES

These marvelous blueberries are remarkably large in size. Fruit tender, plump and practically seedless. Statistics show **more cash profit return per acre than on any other small fruit crop.** Recommended for home as well as commercial planting. Four bushes in your yard will provide enough berries for blueberry pie throughout the season. **Delightfully ornamental, no plant has greater beauty the year around than the Blueberry.** All varieties of blueberries are well adapted for quick freeze in home units. Blueberries may be grown successfully in any soil that is moist and slightly acid. If acid is lacking in your soil this may be attained by adding a heavy application of Peat Moss, rotted sawdust or decayed leaves. Apply aluminum sulphate at the rate of 5 pounds per 100 square feet.

WEYMOUTH. Earliest of all. Ripens berries quickly for early markets. Fruit is above medium in size, attractive blue color, fine flavor. Bush erect, open, spreading, of average vigor.

STANLEY. A recent development fast being recognized in New Jersey Blueberry sections as one of the outstanding Blueberries. Vigorous plants, large berries, good color, high in dessert quality, very productive. Early midseason.

BERKELEY. One of the newer types of blueberries introduced by U.S.D.A. and N.J. Experiment Station. A cross between Stanley, Jersey and Pioneer. Fruit light blue having a mild sweet flavor, flesh firm and crisp. One of the largest blueberries yet introduced. Bush upright, spreading and productive. Ripens mid-season. Berries are not subject to crack.

PEMBERTON. One of the newer varieties being outstanding for its vigorous growth and heavy production of large to very large fruits. Berries are firm, having slight aroma and fine dessert quality. Ripens midseason.

BURLINGTON. A cross between Rubel and Pioneer. Burlington ripens later than Jersey or Rubel and because of good keeping qualities may extend that season for 10 days. The fruit is above average dessert quality, being surpassed only by Stanley, according to most authorities. The bush is erect, vigorous and seems very healthy. The berries are a good blue color, medium to large and hold up in size to the end of the season. Recommended for trial in all sections.

RANCOCAS. Excellent quality early blueberry, bush attains a height of 5 feet, very productive—good shipper.

CONCORD. Large berries, bush at maturity exceeds 6 feet in height, bears a few days before the Rubel.

RUBEL. An upright vigorous grower producing heavy crops of delicious berries. Ripens later, brings premium prices on the market.

JERSEY. The quality of this huge berry can very seldom be equalled. Berries ripen about same time as Rubel.

Prices on Standard Varieties Blueberries.

NEW Recent BLUEBERRY Introductions

Extra Large, Delicious Berries

EARLBLUE. Originated in Weymouth, N.J. by the U.S.D.A. and the N.J. Experiment Station. Earlblue is a cross of Stanley x Weymouth. Fruit clusters medium size, light blue, very firm, subacid, flavor good. Earlblue ripens early with Weymouth, the bushes are upright, very vigorous, well shaped and good producers.

BLUERAY. A new introduction now available. This outstanding blueberry is exceptionally vigorous and very productive. Plant erect and somewhat spreading, ripening a few days ahead of Bluecrop. Fruit is borne in rather small, tight, attractive clusters. Berries are very large, about the size of Berkeley and Coville. They are firm, light blue, highly flavored. Resistant to cracking.

BLUECROP. Originated in Weymouth, N.J., by the U.S.D.A. and the N.J. Experiment Station. Bluecrop is a cross of Jersey x Pioneer with Stanley x June. Fruit clusters of Bluecrop are large, color very light blue, berries are very firm, subacid, excellent flavor. Bluecrop ripens in midseason with Concord. Bush upright and vigorous, very consistent producer.

COVILLE. One of the more recent introductions of the U.S.D.A. selected to give larger berries of good quality and color. Ripening after Rubel and Jersey. Coville is rated as one of our latest berries, large, good blue color, good quality, hangs well to cluster even when ripe thereby requiring less pickings.

The Best ORNAMENTAL SHADE TREES

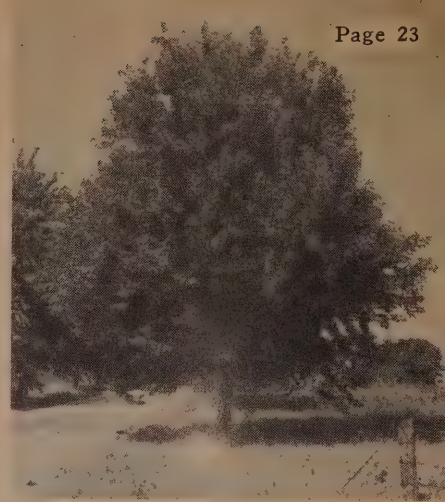

MOUNTAIN GROWN BY TENNESSEE NURSERY

SILVER LEAFED MAPLE (*Acer dasycarpum*)

The most popular and beautiful ornamental shade tree in America which will give you the luxury of quick shade within a few years. Most rapid growing of all Maples. Large spreading tree which at maturity reaches a height of 60 to 70 feet. Desirable for street or lawn. Leaves light green showing silvery white beneath. Thrives in all parts of the United States and does not require rich soil, resists drought and cold.

4 to 5 feet **\$1.25** each
5 to 6 feet **\$1.50** each

SILVER LEAF MAPLE, 6 to 12 inch, 25c each as advertised. Limit one to an order.

TULIP TREE

(*Liriodendron Tulipifera*)

An ornamental tree with unusual flowers. A large, stately tree with smooth bark, glossy light green leaves and spreading branches. Flowers are 1½ to 2 inches long, light greenish yellow and are Tulip shape; blooms appear in late May and early June. Tall growing and hardy.

4 to 5 feet **\$1.35** each
5 to 6 feet **\$1.50** each

CHINESE ELM

(*Ulmus Pumila*)

Rapidly replacing other quick growing trees. Grows 40 feet in height and 20 feet in spread in five years. It has none of the undesirable root characteristics of the Poplars and is faster growing. Dense, dark green foliage; the first shade tree to put out leaves in the spring and the last to shed them in the fall. Thrives on rich or poor soil, resists drought, like the Maple. It succeeds in almost all parts of the United States. Introduced in the United States by the Dept. of Agriculture from Siberia. Hardy as an Oak; beautiful on the lawn as a shade tree.

4 to 5 feet **\$1.25** each
5 to 6 feet **\$1.50** each

THE NEW CRIMSON KING MAPLE

A horticultural triumph. You will want to be among the first to own this gorgeous tree. A beautiful form of Schwedler Maple with intense red foliage throughout the growing season. Hardy. **THE CRIMSON KING MAPLE IS BEAUTIFUL BEYOND WORDS.** These are extra fine trees, will begin branching the first summer after planting.

4 to 5 ft. **\$4.50** each; 6 to 7 ft. **\$6.25** each

BUCKEYE, Yellow Flowering (Horse Chestnut). A dwarf like tree, producing an abundance of beautiful yellow flowers tinged with red, in erect panicles during May. 2 to 3 feet **75c** each.

BUCKEYE, Red Flowering (Horse Chestnut). Similar to the yellow except it blooms a little later, producing showy red flowers. Its beautiful green foliage is attractive all Summer. 2 to 3 feet **95c** each.

LINDEN, American (*Tilia americana*). A large formal tree with beautiful green leaves turning to brilliant yellow in the fall. Fragrant creamy white flowers in the early spring. Much in demand for both lawn and street plantings. 3 to 4 feet **\$1.25** each; 4 to 5 feet **\$1.50** each.

GOLDEN RAIN TREE (*Koelreuteria Paniculata*). One of the best round headed, ornamental, flowering trees in cultivation. In midsummer the entire tree is covered with brilliant yellow blooms, produced in enormous panicles at tips of twigs, a breath-taking sight, followed by conspicuous pods. Max. height 30 feet. Hardy from Missouri south. Sometimes called "China Tree" or "Pride of India." 3 to 4 feet **\$2.75** each.

EUROPEAN WHITE BIRCH (*Betula pendula alba*). A beautiful fast growing well shaped, upright tree with graceful arching outside branches, shimmering white bark. 35 feet maximum height. 4 to 5 feet **\$3.50** each.

MT. ASH EUROPEAN (*Sorbus Aucuparia*). Large flat clusters of creamy-white flowers in the spring followed by immense clusters of flashy orange-red berries in summer and fall. Max. height 20 ft. 3 to 4 feet **\$3.50** each.

MORaine LOCUST (Plant Patent 836). This graceful, new, fast growing shade tree is thornless, seedless, hardy. Lawn grass grows luxuriantly beneath its light, lacy shade. Shaped much like American Elm but not susceptible to disease or insect damage. The absence of seed pods and the quick crumpling of the leaves makes this tree ideal from the garden maintenance standpoint. Thrives in spite of cold, heat or drought on all kinds of soil. 4 to 5 ft. Whips **\$4.50** each; 5 to 6 feet branched **\$5.50** each.

RED or SCARLET MAPLE (*A. rubrum*). A large tree with upright spreading branches. Leaves light green, turning in autumn to brilliant scarlet and orange. 5 to 6 feet. **\$2.75** each.

PIN OAK (*Quercus Palustris*). The most majestic of all shade trees, symmetrical, pyramidal form grows 60 ft. tall at maturity. Sturdy and rugged, adapts itself to all locations. It has no equal for street and lawn planting. A tree planted now endures for generations to come. The fastest growing of all oaks, grows almost as fast as the American Elm. Foliage turns bright coppery-red in the fall. 5 to 6 ft. **\$3.95** each.

SUGAR MAPLE or Hard (*Acer saccharum*). One of our most popular shade trees, thrives in most any type soil. Its beautiful green foliage turns to brilliant scarlet and yellow in the autumn. 5 to 6 feet **\$2.85** each.

SWEET GUM (*Liquidambar Styraciflua*). An ornamental shade tree you will cherish. Slender corky-ridged branches giving it an unusual appearance. Bright green star shaped leaves which fade to a deep crimson in the autumn. 4 to 5 feet **\$1.75** each; 5 to 6 feet **\$2.50** each.

WEeping WILLIOW (*Salix babylonica*). A stately tree with graceful drooping branches. Thrives in any moist soil. Hardy; grows rapidly. 4 to 5 ft. **\$1.25** each; 5 to 6 ft. **\$1.50** each.

PRES. EISENHOWER (Pat. No. 1217). New and brilliant! Large, fragrant double blooms of brightest red open from beautiful long buds. One of the best for cutting as stems are long and flowers are freely produced. Hardy, sturdy, vigorous. \$2.25 each; 3 for \$6.00.

FORTY-NINER (Pat. No. 792). The startling All-American winner for 1949 is probably the most brilliant hued bi-colored rose ever introduced. One can hardly believe that such startling brilliant contrasting colors could be present in one rose. Inside of petal is Orient Red, while the outside is rich chrome-yellow, overlaid with pink. Yellow dominates the bud while red dominates the flower when fully open. Mildly and pleasantly fragrant. Plant tall, upright, branching moderately. Stems long, straight and sturdy with few thorns. \$2.25 each; 3 for \$6.00.

HELEN TRAUBEL (Plant Pat. No. 1028). The most talked of rose for 1952. One of the finest produced since Charlotte Armstrong, winning the Gold Medal of Rome, competing with all the finest foreign roses. A blend of warm pink and luminous apricot, creating a pleasing sparkling effect. The magnificent buds are long, slender and graceful. The open flower, often six inches across, maintains its rich warm color and a delightful spicy fragrance. Plant so vigorous, it is seldom without buds. A rose that will win your heart. \$2.75 each; 3 for \$7.20.

MONTEZUMA (P.P. No. 1383). This King of Grandifloras has caught the public fancy as few roses ever have. A rich scarlet-orange that is unlike the color of any other rose. A profusion of shapely buds develop into big, showy, long-lasting blooms. \$2.75 each; 3 for \$7.20.

CIRCUS (P.P. No. 1382). Floribunda. A magnificent 1956 Award Winner with its gay show of red, yellow, orange, buff and pink colors, its perfect long-lasting, fragrant flowers born in great profusion on sturdy stems. Bush medium size. \$2.50 each; 3 for \$6.60.

NEW PINK PEACE (Pat. 1759). A remarkable new introduction. A deep dusty-pink rose of terrific size, even more free-blooming than the original Peace. The huge, luminous, fragrant blooms are borne singly on long stems opening from shapely buds into fully double roses often measuring 6 inches across. Bush vigorous. \$3.00 each; 3 for \$7.95.

WHITE KNIGHT (Pat. No. 1359). A new 1958 AARS award winner well worth waiting for. The perfect, pointed buds open into large, fully-double, snow-white flowers often 5 inches or more across. Plants vigorous 3 feet tall. We have waited many years for a white rose good enough to win the AARS award. \$3.00 each; 3 for \$7.95.

ALL HEAVY ROOTED 2-YEAR NO. 1 BUSHES

Each Rose INDIVIDUALLY ROOT-WRAPPED with COLORED PICTURE LABEL

MOJAVE (Pat. No. 1176). This outstanding rose has won Gold Medals at Paris and Geneva plus AARS award for 1954. Named for the famous California desert, its rich color is typical of a desert sunset, glowing orange shot with flames of scarlet and vermillion. Beautiful tapering buds open into large, double fragrant, richly colored flowers. Tall vigorous and hardy plants bloom freely from June to frost. \$2.75 each; 3 for \$7.20.

CHARLOTTE ARMSTRONG (Pat. No. 455). This rose will always remain top All-American favorite, you will marvel at the beauty of the lovely long carmine-red buds, with the perfect streamlined form, and at the magnificent open blooms of rich cerise. No printer's ink can illustrate the richness of its color. You have to see it to appreciate it. Plant very hardy and vigorous, producing flowers singly on long stems. On Charlotte Armstrong every bud is perfect. AARS Award for 1941. \$1.50 each; 3 for \$4.20.

MIRANDY (Pat. No. 632). A magnificent rose producing long pointed buds of deep rich red with black shadings, opening to beautiful flowers of Chrysanthemum Red. Mirandy possesses the most delicious, the most full-bodied fragrance you have ever inhaled, you will be pleasurably amazed. Plants medium in height, vigorous and free branching. AARS Award for 1945. \$2.25 each; 3 for \$6.00.

SUTTER'S GOLD (Pat. No. 885). Winner of both top National and International rose awards, receiving AARS Award for 1950 and the Foreign Gold Medal in Paris. The outstanding features of Sutter's Gold is its beautiful long-pointed yellow bud, richly shaded with orange and red. Plant strong, vigorous and free branching, producing great quantities of these extraordinary fine buds, each born on long straight stems, just right for cutting. A rich fragrance not found in any other yellow rose. Very resistant to foliage troubles. \$2.25 each; 3 for \$6.00.

PEACE (Pat. No. 591). The greatest rose of our generation. Perfect rich-gold fragrant buds edged with cerise changing first to canary then to ivory. When fully open flowers appear a sparkling cerise with a creamy-yellow base. Beautiful beyond words. Vigorous healthy free blooming. \$2.50 each; 3 for \$6.60.

MONTEZUMA

We Offer The Newer Roses As Well As Fine Old Favorites

EVERBLOOMING and HYBRID TEA ROSES

Our **HEAVY 2 YEAR NO. 1** Roses Come to You **INDIVIDUALLY ROOT-WRAPPED** with **COLORED PICTURE LABEL!** **NONE BETTER!**

DAINTY BESS. This rose ranks high among the favorites. Strong grower, blooms freely. Large single flowers of soft rosy-pink with wine-red stamens. Fragrant.

THE DOCTOR. Enormous long pointed buds open into fragrant double blooms of satiny-pink, so large you can hardly believe them real.

ETOILE de HOLLANDE. This magnificent red rose is one of the world's most popular. The delightfully fragrant buds of velvety red are borne on long stems. Bush strong, free branching.

ECLIPSE (Patent Expired). Unquestionably the best all-purpose yellow rose for all climates. The slim, tapering, streamlined buds open into large brilliant golden yellow flowers, borne on long erect stems suitable for cutting. Blooms almost constantly all season.

GOLDEN DAWN. The sheer perfection of form and brilliancy of color make this rose one of the very best in its color class. Morning after morning this bush is loaded with lovely long pointed buds of bright sunflower yellow—rich shining yellow. Very fragrant.

NIGHT. The darkest of all roses, deep dramatic crimson, shaded black and maroon. You will thrill to its delightful spicy fragrance. Truly the best of the dark red roses.

KAISERIN AUGUSTE VIKTORIA. One of the best white roses, blooms continuously. Beautifully formed buds, fully double, flowers of purest white, very fragrant.

PICTURE. Lovely deep pink buds opening to a warm glowing pink with undertones of salmon. Plant strong, vigorous, blooms borne on long stems. Delightfully fragrant.

CHRISTOPHER STONE. One of the best bright red roses. A brilliant, sparkling scarlet-crimson. Shapely long pointed buds open into large attractive bloom with true old rose fragrance. Bush healthy, vigorous, free bloomer.

PRESIDENT HERBERT HOOVER. Any rose planting would be incomplete without this wonderful multicolored rose, combining shades of cerise, pink, flame, scarlet and yellow. The long buds are beautifully formed and open slowly into gigantic blooms possessing a delightful fragrance. Grows 4 feet in one season. It is not a question of how long you want the stems to be, it is only how long you wish to cut them. Give it plenty of room.

PINK RADIANCE. There are not enough adjectives, nor color plates, good enough to do justice to the large perfect rose-pink buds and flowers of the Pink Radiance. Each flower is heavily petaled, substantial and long lasting. Blooms all season, intensely fragrant.

POINSETTIA. One of the most brilliant scarlet roses we know of. Bush is vigorous and hardy. Buds are long, borne in abundance, opening slowly into gorgeous blooms.

RED RADIANCE. One of the most popular of all red roses. The vigorous bush will produce a continuous succession of huge clear dazzling red flowers, delightfully fragrant and long lasting with big heavy textured petals. It is a red which stays red until the last petal falls.

TALISMAN (two-toned). A vividly colored, exquisitely formed rose. The buds of golden yellow and orange-scarlet are borne on long stiff stems and are richly fragrant. The rose is highly prized by florists.

CRIMSON GLORY (Pat. Expired). The beautiful buds open into magnificent flowers of velvety crimson with black and maroon shadings. Richly perfumed. Most popular variety in its color class.

Special as advertised. (Limit one to a customer, our selection)
2 Yr. No. 2 Field Grown Roses 25c each. Not labeled as to color or variety.

Hardy Climbers Will Give Your Garden Breath-taking Beauty

For background use, on fences, trellises or pillars.

CLIMBING NEW DAWN (Pink). Perfect Everblooming Hybrid Tea climber, blooms constantly from late spring to frost. The flowers are large double, a lovely apple-blossom pink, delightfully fragrant, grown on long stems. Superb for use in bouquets. Hardy. Will bloom this season.

BLAZE. The most popular of the Everblooming climbers, brilliant double red flowers produced by the thousands. This rose blooms continually from June through September.

CLIMBING ETOILE de HOLLAND. We rate this as the finest red climber grown. Produces enormous quantities of choice red buds, often larger than the bush variety, unexcelled for cutting. Vigorous green foliage.

CI. PRESIDENT HERBERT HOOVER. One of the best multi-colored climbers. Flame pink and buff. A rampant climber. Ideal for cutting.

PAUL'S SCARLET. One of the most admired of all red climbers. Its vivid scarlet flowers are freely produced in clusters of from 3 to 20 blooms on long much branched canes, the plant being a mass of flaming color from top to bottom. For a brilliant mass of spring color this rose is hard to beat. Hardy even in sub-zero climates.

CLIMBING K. A. VIKTORIA. One of the most popular snowy-white climbers, a vigorous and free bloomer, fragrant.

GOLDEN CHARM. Gives a gay splash of color that is admired over and over. The buds burst into handsome rich apricot yellow bloom, with slight pinkish cast. It's superb, sparkling, outstanding.

MARSHALL NEIL. The grand old favorite with a fragrance equal to none. Full double, golden-yellow blooms produce abundantly all season from early to late. No home should be without this delightfully fragrant climber. Supply limited. \$1.75 each.

FLORIBUNDAS

FLORIBUNDAS have leaped to popularity because of their low growth, riotous display of brilliant colors blooming steadily from spring until frost. Ideal for use under picture windows, for hedging, borders and foundation planting.

RED RIPPLES. A clear true-red, one of our best Floribunda roses, 30 in. tall.

ELSE POULSEN. Large double rose-pink, fragrant. The perfect Floribunda for cutting.

DAGMAR SPATH. One of our leading Floribundas, alabaster-white. Clusters of large bloom all summer long. Fragrant. 24 inches tall.

GOLDEN SALMON. Rich deep salmon, glows like copper, one of the brightest and flashiest Polyantha roses. 20 inches tall.

FLORADORA. Scarlet and geranium red FLORIBUNDA producing an abundance of double 25 petaled flowers borne in clusters. Winner A.A.R.S. 1945 award.

NEW and RARE ORNAMENTAL SHRUBS

ALMOND, Double Pink-flowering (*Prunus glandulosa*). A beautiful small tree. Branches are completely covered in May with rose like pink blossoms. 18 to 24 in. **85c** each. **ALTHEA** (*Rose of Sharon*). Blooms constantly from mid-July through September. Large bright colored flowers. Much in demand for borders, hedges and specimen planting. All double flowering. We offer the following colors: Red, Pink, Violet and White. 18 to 24 in. **60c** each; **3** for **\$1.50**.

BEAUTYBUSH (*Kolkwitzia amabilis*). An oriental shrub with gracefully arching branches. The lovely, clear-pink bell-like flowers are borne in profusion in May and June. Thrives in any type soil, hardy. Grows 8 feet tall. 18 to 24 in. **\$1.00** each; **3** for **\$2.70**.

BURNING BUSH (*Dwarf Winged Euonymus alatus compactus*). An excellent dwarf ornamental shrub, yellow flowers, May-June followed by red fruit. In autumn the leaves turn brilliant coppery-crimson. Has unusual corky bark. Thrives in partial shade or full sun. Hardy, maximum height 4 to 5 feet. Attracts attention spring, summer, fall and winter. 12 to 15 inch **\$1.50** each; **3** for **\$4.20**.

CREPE MYRTLE. One of the most beautiful of all shrubs, an old favorite of the South. With a little protection, can now be grown in many of the northern states. Blooms profusely from midsummer until frost. The flowers have a crepe-like texture and may be had in beautiful shades of Pink, Purple, Red and White. 18 to 24 in. **75c** each.

CALYCANTHUS (*Sweet-Shrub*). Highly ornamental, bearing spicy scented flowers of a rare chocolate color from June throughout the season. Thrives in either sun or shade. 18 to 24 in. **65c** each; **3** for **\$1.65**; 2 to 3 ft. **75c** each; **3** for **\$1.95**.

AMERICAN CRANBERRY BUSH (*Viburnum trilobum*). One of the most cherished and beautiful large-growing shrubs available. Beautiful bright green foliage, clustered white blooms in May followed by clumps of extremely large ornamental bright-red berries remaining until early winter. Hardier and superior to more common European Cranberry bushes. Maximum height 8 to 10 feet. 18 to 24 inches **\$1.25** each; **3** for **\$3.45**.

IMPROVED CHENAULTI CORALBERRY (*Symphoricarpos chenaulti*). Delicate pink flowers are followed by brilliant coral-red berries which remain on bush most of the winter attracting song birds. Foliage reddish green. 18 to 24 in. **50c** each; **3** for **\$1.25**.

CUTLEAF CHASTE TREE (*Vitex Incisa*). A lovely shrub that begins to bloom in early summer continuing until late fall. Flowers are delightful lavender-blue borne on long spikes. Grows 6 to 8 feet tall. Thrives in wet or dry locations. 18 to 24 inch **65c** each.

DOGWOOD, Red Osier (*Cornus stolonifera*). Erect red branches. Flowers creamy white borne in clusters followed by blush-white berries which attract many song birds. 18 to 24 in. **50c** each; **3** for **\$1.25**.

PRIDE OF ROCHESTER DEUTZIA. Prized for its profusion of large double white flowers with pink tinge. Excels all Deutzia in size of bloom. Fast growing, upright shrub. 2 to 3 feet **50c** each; **3** for **\$1.25**.

DOUBLE PINK DEUTZIA (*Crenata*). The most graceful and prettiest of all Deutzia. Covered with abundance of delicate double pink blossoms. Thrives in sun or light shade. Attractive both winter and summer. 2 to 3 feet **65c** each; **3** for **\$1.65**.

NEW HYPERICUM HIDCOTE. A showy, dwarf shrub recently introduced from England. Ideal for foundation planting. Maximum height 18 inches. Attractive foliage with cup-like blooms of brightest yellow, often measuring 2 inches in diameter, blooming from June to October. 2 yr. 12 to 18 inch **\$1.75** each; **2** for **\$3.30**.

HILLS OF SNOW HYDRANGEA (*aborescens grandiflora*). One of the showiest of flowering shrubs with long lasting massive white flowers in August, remaining on plant 4 to 5 weeks. Thrives in either sun or shade. Grows 5 to 7 feet tall. 18 to 24 inches **95c** each.

HYDRANGEA OAK LEAF (*quercifolia*). Handsome jade green foliage shaped like oak leaves changes to beautiful red and gold each fall. A high quality shrub with large white flowers. 18 to 24 inches **90c** each; **3** for **\$2.45**.

LIBERTY SHRUB—NEW THREE-IN-ONE ALTHEA. Our national colors in living form. Truly an unusual shrub, part of the flowers red, part white and part blue all in full bloom at the same time. Be among the first in your neighborhood to plant this beautiful 3-N-1 Althea (also known as 3-N-1 Rainbow Rose of Sharon). Blooming size plants, 3 to 4 ft. **\$2.95** each. Supply limited.

Shrubs as Advertised. (Limit one to a customer).
Lonicera T. Rosea, 6 to 12 in. field grown liner
25c each.

GOLDEN KERRIA JAPONICA (*The Globe Flower*). Beautiful golden yellow flowers cover this bush all summer. Luxurious dark green foliage. Maximum height 8 feet. Hardy. 12 to 18 in. **\$1.00** each; **3** for **\$2.70**.

LONICERA—Bush Honeysuckle. Among the easiest shrubs to grow as they do well in poor soil and exposed locations. Valuable as borders as screening plants and specimens. The beautiful blooms in the Spring are followed by red berries in the Fall. We offer the following varieties: *Tatrica Rosea*, a rosy-pink; *Morrowi*, a creamy-white. 18 to 24 in. **50c** each; **3** for **\$1.25**.

LILAC (*Persian*). The flower our Grandmothers loved. A beautiful shrub bearing an abundance of delicate lavender blossoms in April and May. Foliage finely cut. Height 6 to 8 feet. Usually blooms first year. 18 to 24 in. **80c** each; **3** for **\$2.10**.

HYBRID FRENCH LILACS. One of our finest shrubs, highly prized for their wide range of colors and fragrant flowers. Unsurpassed as specimen plants and also highly desirable in the border. Plants bloom when quite small. We offer the following outstanding varieties: *Pres. Grevy*. Double flowers, dark blue; *Bell de Nancy*. Double flowers rose-pink; *Charles X*. Single flowers reddish-purple. 12 to 18 in, **95c** each; **3** for **\$2.55**.

FRAGRANT VIRGINAL MOCK ORANGE. This wonderful shrub is hardy, easy to grow, attains height of 6 feet. Thrives in full sun or partial shade. In May and June the bush is loaded with pure snow-white flowers so fragrant they perfume the entire garden, continuing to bloom off and on all summer. 18 to 24 in. **\$1.00** each; **3** for **\$2.75**.

FRAGRANT PINK SNOWBALL (*Viburnum Juddi*). Improved Carlesii, in the spring this magnificent shrub is covered with pink flowers which later turn white, so fragrant they perfume entire garden. Grows 5 to 6 feet tall. The deep green foliage colors bronzy-red in the fall. Grows in full sun or partial shade. Very hardy. 15 to 18 in. **\$1.80** each; **3** for **\$5.10**.

JAPANESE SNOWBALL (*Viburnum tomentosum*). The well known favorite, prized by every gardener. It has immense globular clusters of flowers in May and June; grows 6 to 8 feet tall. Valuable for specimen plants and also for grouping and massing. 18 to 24 in. **\$1.10** each; **3** for **\$3.00**.

ROSE ACACIA (*Robina hespida*). Bush type Moss Locust. A beautiful tree like shrub with light green foliage and graceful clusters of pea-shaped rose-pink flowers. Blooms June and July. 18 to 24 in. **95c** each; **3** for **\$2.55**.

FEATHERY TAMARIX (*Odessa*). There is a lacy loveliness about this shrub not found in others. Silvery blue-green foliage and attractive pink flower spikes. Grows 8 to 10 feet however it may be kept pruned to 5 or 6 feet. Thrives in sun or partial shade. 18 to 24 in. **75c** each; **3** for **\$1.95**.

FLAMING RED WEIGELA. Similar to Weigela Vanaceki. One of the most popular and beautiful red weigelas. Blooms literally cover bush from May to June, continuing to bloom off and on until fall. Hardy everywhere, has withstood 15 degrees below zero. Likes full sun or partial shade. Grows 6 feet tall. Will bloom first year after planting. 18 to 24 in. **95c** each; **3** for **\$2.55**.

YELLOW WEIGELA (*Weigela Lutea*). A desirable and unusual shrub with pure-yellow flowers in May and June. Foliage has reddish cast during the summer becoming pronounced in the fall. 18 to 24 in. **75c** each; **3** for **\$1.95**.

DWARF VARIEGATED WEIGELA. Lovely pale-pink trumpet shaped blossoms borne in profusion in June. The deep foliage edged with lacy trim of creamy-white. Makes a graceful and unusual spreading shrub attaining height of 4 to 5 feet. 12 to 18 in. **\$1.00** each; **3** for **\$2.70**.

FORSYTHIA (Golden Bell)
18 to 24 inches 50c each; 3 for \$1.25

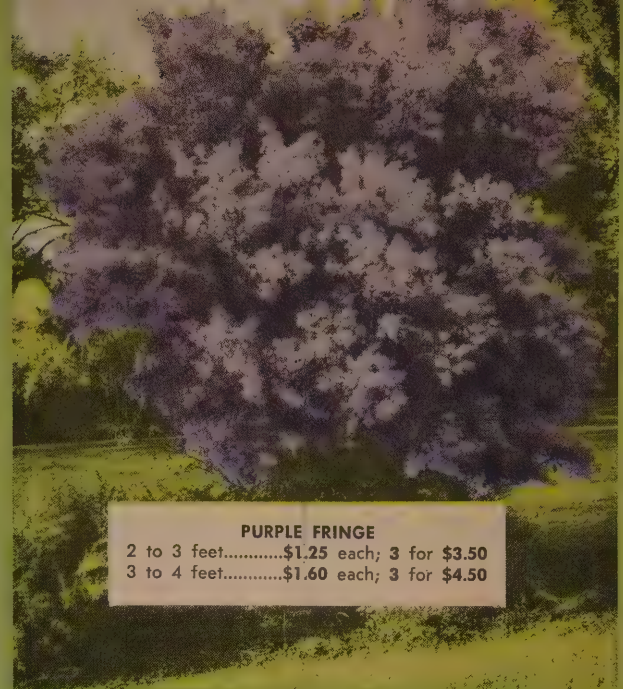

JAPANESE FLOWERING QUINCE

BUDDLEIA. Magnificent long panicles of fragrant lavender-pink flowers cover this plant from midsummer until frost. Vigorous, good foliage; hardy in most sections. Sometimes called Summer Lilac. The sweet scented flowers attract the butterflies which adds to its interest. 18 to 24 in. 80c each; 3 for \$2.10.

GOLDEN BELL, FORSYTHIA (Intermedia spectabilis). Among the showiest of spring flowering shrubs, producing an abundance of brilliant yellow flowers in the early spring. Thrives well in any soil or climate. 18 to 24 inches 50c each; 3 for \$1.25.

HYDRANGEA (paniculata grandiflora (Peegee Hydrangea)). Massive panicles of white blooms, flowers gradually turn to pink and then to bronze, remaining on shrub until frost. Blooms profusely August and September. 18 to 24 in. 85c each; 3 for \$2.25.

JAPANESE FLOWERING QUINCE (Cydonia japonica rubra). An old favorite found in almost every garden. Also known as "Japonica." Flowers vary from scarlet to shades of orange and pink, blooming in the early spring, lasting for several weeks. Highly ornamental. 18 to 24 inches. 90c each; 3 for \$2.40.

SPIREA ANTHONY WATERER. A low growing, late-flowering shrub of dwarf habits producing abundant clusters of rose-pink flowers throughout the late summer. 12 to 15 inches 80c each; 3 for \$2.10.

SPIREA VAN HOUTTEI (S. Van Houttei). The most popular of all Spirea. Producing fountains of beautiful white flowers in the early spring, completely covering its gracefully arching branches. 18 to 24 in. 40c each; 2 to 3 feet 65c each.

SPIREA BILLIARDI ROSEA (Billiard Spirea). Late flowering with tall spikes of deep pink flowers in July and August. Excellent for cut flowers. Height 4 to 5 feet. 2 to 3 feet 75c each; 3 for \$1.95.

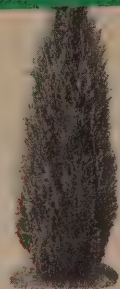

All 10 to 12 inch evergreens priced below are the finest type 2 year field grown transplants that will grow into beautiful specimen plants saving you many dollars.

CONIFEROUS and BROADLEAFED EVERGREENS

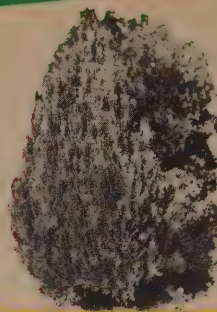

PFITZER JUNIPER

(*J. chinensis pfizeriana*). The best and most dependable spreading evergreen. Hardy, excellent for both sun and partial shade. Handsome feathery green foliage. 10 to 12 inch, 2 yr. \$1.20 each; 12 to 15 inch \$2.00 each; 15 to 18 inch \$2.50 each; 18 to 24 inch \$3.75 each.

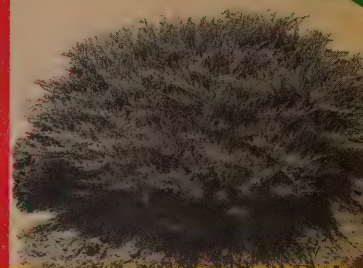

IRISH JUNIPER

(*J. communis hibernica*). One of the best, never too tall or bushy, holds its slender erect shape without shearing. Neat silvery foliage. Valuable for foundations, corners or entrances. 10 to 12 inch, 2 yr. \$1.00 each; 18 to 24 inch \$2.50 each; 2 to 3 ft. \$3.00 each; 3 to 4 ft. \$3.75 each.

BERKMANS DWARF GOLDEN ARBORVITAE

(*Biota orientalis aurea nana*). The best known and most extensively planted arborvitae. A pretty compact symmetrical dwarf evergreen. Attractive bright yellow foliage. 12 to 15 inch \$1.75 each, 15 to 18 inch \$2.50 each; 18 to 24 inch \$3.00 each; 3 to 4 ft. \$3.75 each.

ANDORA JUNIPER

(*plumosa*). A prostrate creeping type, ideal for banks, steps and borders. Silvery-green foliage in the spring and summer, turning beautiful mauve-pink at first frost. 10 to 12 in., 2 yr. \$1.50; 12 to 15 inch \$2.00 each; 15 to 18 inch \$2.50 each.

MAGNOLIA SOULANGEANA

One of the first trees to bloom in the early Spring, the delightfully fragrant flowers appear before the leaves. The large purplish-pink blossoms are often 8 inches across. Maximum height 10 to 12 feet. Very hardy, often blooms same year planted. Sheds foliage in late fall. 18 to 24 inches \$2.50; 2 to 3 feet \$3.75.

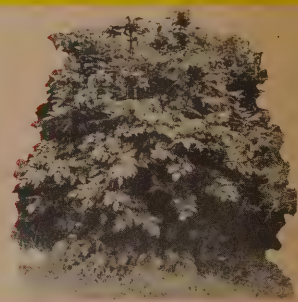

NANDINA FOR BERRIES

Domestica (Heavenly Bamboo). A showy shrub, medium height 3 to 4 feet. Large clusters of flaming-scarlet berries through fall and winter with rich-red leaves. Foliage is bright green during summer. 12 to 15 inch 2 yr. \$1.50 each; 15 to 18 inch \$2.25 each; 18 to 24 inch \$2.75 each.

EVERGREEN WINTERBERRY

(*Euonymus patens*). Our best all purpose broadleaf evergreen with its luxuriant leathery glossy green foliage. In the fall an abundance of orange bitter-sweet berries add to its charm. Fine for specimen, background or hedge. May be sheared. 15 to 18 inch \$2.00 each; 18 to 24 inch \$2.50 each.

LEATHER-LEAF GRAPE HOLLY

(*mahonia Beali*). Our most popular Holly, ideal for shady spots. Huge leathery blue-green leaves year 'round. Fragrant bright-yellow flowers appear in early spring followed by grape-like bunches of blue berries. Grow 3 to 4 feet. 12 to 15 inch \$2.25 each.

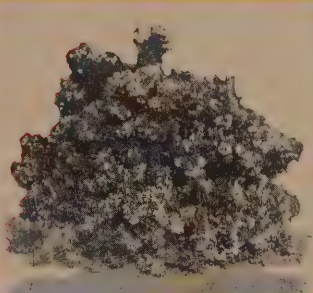

CANADIAN HEMLOCK

(*Tsuga canadensis*). America's most popular evergreen with its long slender branches drooping gracefully to the ground. Rich dark green foliage. Hardy, easily transplanted, withstands partial shade. 12 to 15 inch \$2.25 each; 18 to 24 inch \$2.75 each; 2 to 3 feet \$3.75 each.

WAXED LEAF LIGUSTRUM

(*ligustrum lucidum*). The South's most beautiful and best large leaved evergreen shrub. Thick waxy leaves, dark green on top, light green underneath. For foundation, hedge or specimens. 10 to 12 inch 2 yr. \$1.00; 15 to 18 inch \$1.50; 18 to 24 inch \$2.50; 2 to 3 feet \$3.50.

GLOSSY ABELIA or BUSH ARBUTUS

(*Abelia Grandiflora*). The grandest of all flowering evergreens. This plant is covered with fragrant pinkish white bell shaped flowers from early spring until frost. Foliage glossy dark-green, arching branches. 18 to 24 inch \$1.25 each; 2 to 3 feet \$2.00 each.

RED-BERRIED BURFORD HOLLY

(*Ilex cornuta burfordi*). Handsomest of all broadleaved evergreens and finest of the hollies for southern planting. The lustrous green leaves have one strong spine at tip. Great clusters of large shining-red berries. Hardy as far north as Missouri. Perfect shrub for foundation or specimen plantings. 12 to 15 in. \$2.50 each; 18 to 24 in. \$4.00 each.

NOTE: All evergreens are taken up carefully to secure the tender roots, soil removed, and balled in wet moss. This method makes low cost transportation possible, insuring excellent root growth. If desired earth balled, add \$1.50 per plant. ALL EVERGREENS SHIPPED SEPARATELY TRANSPORTATION COLLECT.

EVERGREENS CONTINUED

GLOBE ARBORVITAE

(*Thuja globosa*) Dwarf, compact, a perfect globe, its spread usually equals the height. Foliage light green. Ideal for foundation planting. Grows 3 feet. 10 to 12 inch 2-yr. \$1.75; 12 to 15 inch \$2.50; 15 to 18 inch \$3.50; 18 to 24 inch \$3.75 each.

BAKER'S ARBORVITAE

(*biota bakeri*) A striking evergreen that retains its compact pyramidal shape without shearing. The fragrant flat foliage is deep green all seasons, slow grower. 10 to 12 inch 2-yr. \$1.00 each; 15 to 18 inch \$1.65 each; 18 to 24 inch \$2.25 each; 2 to 3 feet \$3.00 each.

SCARLET FIRETHORN

(*pyracantha gibbsii*) This picturesque evergreen provides a fiery display of bright-red berries from late fall until spring. Evergreen foliage, white flowers in May. Deserves a place in every garden. 15 to 18 inch \$1.75; 18 to 24 inch \$2.50; 2 to 3 feet \$3.25 each.

AMERICAN HOLLY

(*Ilex opaca*) A true Christmas Holly, shiny glossy foliage year round with bright-red berries in the winter. Grows in sun or partial shade. May be pruned as specimen or grown into tree. 15 to 18 in. 2-yr. \$2.25 each; 18 to 24 inch \$3.00 each; 2 to 3 feet \$3.75 each.

MAGNOLIA GRANDIFLORA

The best known southern evergreen flowering tree, sometime attaining a height of 70 feet. Huge, creamy, white, fragrant flowers followed by large pods with bright red seed. 18 to 24 in. \$3.25; 2 to 3 feet \$4.25.

KURUME AZALEAS

No flower can equal the Azalea for a mass of color. The entire plant is completely covered with a profusion of the most beautiful blooms imaginable. Azaleas are not difficult to grow, however, they require acid soil and an abundance of humus and uniform moisture. Hardy as far north as the southern New England states. We offer the following varieties: Coral Bells. A brilliant coral-pink. Hinodogire. A beautiful fiery-red. Hexe. A deep crimson-red. Snow. Pure snow-white. 6 to 8 in. \$2.00; 8 to 10 in. \$2.25; 10 to 12 in. \$2.95.

RED LEAF BARBERRY

Very popular for specimen grouping and for edging taller planting of shrubs or evergreens. Brilliant glossy purplish-red leaves. Heavy 12 to 15 inch transplants 90¢ each; 3 for \$2.50; 10 for \$7.50.

GREEN LEAF BARBERRY

Bright green foliage changes to brilliant color in the fall. Has bright scarlet berries throughout the winter. Dwarf and spreading. Very hardy. May be sheared when planted as hedge. Heavy 12 to 15 inch transplants 90¢ each; 3 for \$2.50; 10 for \$7.50.

Prices net not subject to Free Bonus.

ROSE TREE OF CHINA (Prunus Triloba). All who see this tree say it's the most beautiful of all ornamental trees. Truly a glorious sight in the early spring with hundreds of pink, double, rose-like blooms completely covering the branches. Very hardy. Maximum height 12 to 15 feet. Stocky 18 to 24 inch plants \$1.50 each; 3 for \$4.20.

PEPPERMINT STICK Double Flowering Peach. Highly ornamental dwarf type tree, when in full bloom its variegated pink and white blossoms resemble a huge stick of peppermint candy. 18 to 24 in. 60c each; 2 to 3 ft. 75c each; 3 to 4 ft. \$1.00 each.

CATALPA Western (Catalpa speciosa). A beautiful tree with immense tropical leaves bearing clusters of white flowers with purple centers. Grows rapidly, thriving in very poor soil. Popular for the production of Catalpa Worms, used as pan fish bait. 3 to 4 feet 85c each; 3 for \$2.25; 5 to 6 feet \$1.25 each; 3 for \$3.45.

CHERRY BIRD (Prunus serotina). A beautiful flowering tree bearing long clusters of white flowers in May, followed by bright red berries beloved by our song birds. 2 to 3 feet 75c each; 3 for \$1.95; 4 to 5 feet \$1.25 each; 3 for \$3.45.

DOGWOOD, Pink Flowering (*Cornus florida rubra*). No flowering tree is more admired and extensively used than the Dogwood. Handsome throughout the year with its spectacular large flowers of deep-pink completely covering the tree in the early Spring. Highly colored foliage in the Fall, followed by red berries which hang on well into the winter. Blooms very young. Maximum height 15 to 20 feet. 15 to 18 in. 2 yr. \$1.95 each; 18 to 24 in. 2 yr. \$2.15 each; 2 to 3 ft. 2 yr. \$2.50 each. We also offer heavy 3 yr. old well branched SPECIMEN pink Dogwoods, individually balled in peat moss. 3 to 4 ft. \$7.00 each.

DOGWOOD, White Flowering (*Cornus florida*). The same as Pink Dogwood described above, except the flowers are a glorious white. 18 to 24 in. 75c each; 2 to 3 feet \$1.25 each; 3 to 4 feet \$1.75 each; 4 to 5 feet \$2.25 each.

AMYGADALUS PERSICA (Double Flowering Peach). These are decorative, shapely little trees, beautiful beyond words when in bloom. In early spring they are covered with a mass of highly colored double flowers. Thrive in any soil suited to peaches. We offer these in red, white and pink. 18-24 in. 60c each; 2 to 3 feet 75c each; 3 to 4 feet \$1.00 each; 4 to 6 feet \$1.75 each.

RUBY TREE (Prunus Thundercloud). One of the finest ornamental Dwarf Blood-Leaved Plum trees. Red foliage retains color well throughout summer. Pink blossoms in Spring followed by an abundance of bright red plums. 18 to 24 in. 75c; 2 to 3 ft. \$1.00; 3 to 4 ft. \$1.25; 4 to 6 ft. \$1.75.

JAPANESE FLOWERING CHERRY

Now you can have the same beautiful Flowering Cherry in your own yard as are so much admired in Washington, D. C., by all who see them. Low growing spreading trees, thriving in full sun or partial shade. Hardy, having withstood 20 degrees below zero. We offer the following varieties:

KWANZAN. Possibly the most popular of all varieties. The flowers are fully double, large, rich deep rosy-pink, measuring almost 2 inches across. Trees hardy, vigorous and upright. 3 to 4 feet \$3.75 each.

JUDAS TREE (Red Bud). A small dainty ornamental tree. Its branches are filled with clusters of rosy-pink flowers in the early spring. One of our most valuable native flowering trees. 3 to 4 feet \$1.25 each; 5 to 6 feet \$1.75 each.

MIMOSA TREE (Albizia Julibrissin). A beautiful dwarf-like spreading tree. Lacy foliage, pink silky flowers, produced in abundance in June and July. Blooms young. Not hardy north of Mason-Dixon Line. 2 to 3 feet 65c each; 3 to 4 feet \$1.00; 4 to 5 feet \$1.25.

RAINBOW FLOWERING PEACH. See Page 15 for price and description.

PRUNIS NEWPORTI (New Purple Leaved Plum). This lovely small tree retains its purplish red foliage during the summer, making a pleasing contrast with other plantings. Beautiful pink blossoms in May. In addition it bears fruit of high quality in abundance. 18 to 24 in. 75c; 2 to 3 feet \$1.00 each; 3 to 4 feet \$1.25 each; 4 to 6 feet \$1.75 each.

READY TO BLOOM COLORFUL BEAUTIES — COL. NO. 55

1 Glorious White Amygdalus Persica (Dwarf type Double White Flowering Peach) 4 to 6 feet.

1 Flaming Red Amygdalus Persica (Dwarf type Double Red Flowering Peach), 4 to 6 feet.

Both trees for only.....**\$2.25**

(Value \$3.50, you save \$1.25)

Prices net not subject to Bonus Plants.

ELEYI
PURPLE LEAF FLOWERING
Crab Apple
ONE OF THE FINEST FLOWERING CRABS

Tree is hidden in the early spring by masses of bright red blossoms. The attractive red fruit is born in abundance, hangs on the tree well into the winter. Makes a distinctive bright-red jelly. In the spring and early summer the foliage is a rich deep bronze, turning to bright red in the fall.

1 to 2 feet \$1.00 each; 2 to 3 feet \$1.20 each; 3 to 4 feet 1-yr. \$1.45 each; 4 to 6 feet 1-yr. \$1.60 each; 3 to 4 feet 2-yr. \$1.60 each; 4 to 5 feet 2-yr. \$1.90 each; 5 to 6 feet 2-yr. \$2.10 each.

THE MODERN LIVING FENCE

ROSA MULTIFLORA JAPONICA — HARDY, STOCK-PROOF, BEAUTIFUL

We list a few reasons why you should plant this New Living Fence, developed by the U. S. Soil Conservation Service.

- It gives you a practical and effective fence at a fraction of the cost of wire fencing. A fence that will turn all kinds of stock as well as the highest jumping cow.
- A fence that requires no maintenance, pruning, training or supports.
- Thrives under a wide range of soil types and conditions. Does not kill the ground beyond its own limb spread since it does not spread from roots or runners.
- When full grown makes a living fence 6 to 8 feet tall and 5 to 7 feet wide, forming a solid wall through which no live stock can pass.
- Gives windbreak protection to your crops and fields, conserves both soil and moisture. Preliminary check made in 1947 shows where corn yields as much as

50 per cent greater in rows adjacent to Multiflora hedges than in rows in the center of the same field.

- Flowers fragrantly and abundantly in spring. These flowers mature into bright red clumps of berries which persist throughout the winter months, offering both food and cover for game birds, mammals, and insect eating song birds.
- Controls fence line weeds, we have yet to see any sprouts come through it.
- Highly recommended for hedging around the home, may be kept trimmed to any desired height.

	Per 25	Per 50	Per 100	Per 1000
12 to 15 inches.....	\$2.00	\$3.50	\$6.50	\$57.50
15 to 18 inches.....	\$2.75	\$5.25	\$8.50	\$67.50

ORNAMENTAL HEDGES

PRIVET, AMUR RIVER (South). One of the finest Evergreen type Hedges retaining its bright green foliage through the average winter. Just as hardy as the California Privet. Rapid grower, making a dense hedge in a very short time. May be kept trimmed to any desired height.

12 to 18 in.....10 for \$1.00; 25 for \$2.25; 50 for \$4.00; 100 for \$7.00
18 to 24 in.....10 for 1.25; 25 for 2.75; 50 for 5.00; 100 for 9.00

PRIVET, AMUR RIVER (North). This hedging is very hardy, recommended for cold climates. Usually holds its glossy green foliage until Christmas time. Thrives in any type soil without special care. May be severely sheared.

12 to 18 in.....10 for \$1.50; 25 for \$3.00; 50 for \$5.50; 100 for \$10.00

RED AND GREEN LEAF BARBERRY, see page 29 for prices.

BUSH HONEYSUCKLE — (Lonicera tatarica). Hardy. Grows rapidly in poorest soil, full sun or partial shade. Max. height 10 ft. Fragrant pink flowers born freely in May and June, followed by red berries, attractive to birds. Ideal for hedging or screening. Plant 2 feet apart for hedge or 3 feet apart for screen.

	10	25	50	100
12 to 18 inch.....	\$2.30	\$4.95	\$ 8.95	\$15.95
2 to 3 feet.....	4.95	9.45	17.75	33.50

SPIREA VAN HOUTTEI. Millions of small white blossoms cover the gracefully arching branches every spring. Hardy, thrives everywhere in sun or shade. Plant 2 to 3 feet apart. Makes a natural hedge requiring no trimming or special care. 9 to 12 inches 10 for \$1.75; 25 for \$2.90; 100 for \$9.95.

HARDY CLIMBING VINES

CHINESE BITTERSWEET (celastrus orbiculata oriental). The most prolific fruiting variety known. Grows rapidly in any type soil, sun or partial shade. In autumn orange scarlet berries cover the vine. Excellent for fall and winter bouquets. Strong No. 1. 75c each; 3 for \$2.10.

CLEMATIS, JACKMANII. The finest free flowering variety we know of. Blooms from May to frost. The flowers are from 4 to 6 inches across, intense violet-purple with velvet texture. The whole vine is often a mass of striking color. \$1.25 each; 3 for \$3.45.

CLEMATIS, HENRYI. The finest of all white-flowered Clematis. Blooms continuously. \$1.35 each; 3 for \$3.75.

CLEMATIS, MME. ANDRE. A rare, new, large Red flowering variety of Clematis, blooms equal to Jackmanii in size. \$1.35 each; 3 for \$3.75.

CLEMATIS, PANICULATA. A very rapid grower and the finest of all small flowering Clematis. From midsummer to autumn the entire vine is covered by a mass of fragrant pure white blooms. \$1.00 each; 3 for \$2.75.

ENGLISH IVY (Hedera helix). Very popular, its glossy evergreen foliage unexcelled for use as ground cover, borders to walks, and wall covering. 65c each; 3 for \$1.65.

GOLDFLAME HONEYSUCKLE. Immense showy clusters of trumpet-shaped buds. Outside petals flaming coral-red, with golden-yellow inside, exquisitely fragrant. Hardy, thrifty grower, blooming first year after planting from May until frost. Ideal for trellis or ground cover. If pruned may be used as everblooming hedge or specimen shrub. Strong 2 Yr. plants \$1.00 each; 3 for \$2.75.

HALL'S FRAGRANT HONEYSUCKLE (Lonicera halliana). A strong vigorous climber covered with very fragrant white flowers the entire summer. Hardy. Foliage stays green nearly all winter. 2 Yr. No. 1 plants 60c each; 3 for \$1.65.

TRUMPET FLOWER. A very showy free growing vine with deep glossy evergreen foliage and large clusters of bright red, yellow throated, trumpet like flowers. A dependable bloomer, hardy to 25 degrees. 60c each; 3 for \$1.50.

VINCA MINOR. (periwinkle) A showy effective EVERGREEN GROUND COVER. Spreads quickly, forming a dense carpet 3 to 6 in. high. Attractive Glossy Foliage stays green winter and summer. Thrives in sunlight or dense shade where other plants will not grow. Also used to hold steep banks. Sky-blue flowers in early spring. Medium clumps, 5 for \$1.50; 10 for \$2.00; 50 for \$7.50; 100 for \$12.00.

WISTERIA. Among the most beautiful and spectacular of all flowering vines is the Wisteria. Fast growing, it will soon cover a trellis or drape over a fence or arbor and in the spring hide itself behind a screen of long pendulous clusters of flowers. May also be trained to tree form. Very few plants can hope to rival its great beauty. It is as hardy as it is lovely. We offer the Chinese Purple and Chinese White. \$1.00 each; 3 for \$2.70.

SILVER LACE VINE. Blooms from summer until late fall, one of the fastest growing silver vines, ideal for screening purposes. Resembles a cloud with its dainty snowy-white blossoms. No. 1 plants 90c each; 3 for \$2.50.

Kudzu Vine, the Great Forage Crop and Soil Builder

Kudzu is a perennial legume containing more protein than alfalfa or wheat bran, thriving where alfalfa cannot grow. It will enrich non-productive barren hillsides more permanently and more rapidly than by any other means. Poor worn out soil regains its fertility and becomes richer every year. Recommended for erosion control as its roots penetrate so deeply it prevents washing. Yields two cuttings as a hay crop in the north and from 2 to 4 in the south. Some southern planters have reported 10 tons per acre in a single season. Prepare ground as for corn, set 5 to 10 feet apart, requires 450 plants to acre. This valuable plant is also used for quick ornamental shade and screening purposes. 3 Yr. plants 12 for \$1.50; 25 for \$2.50; 50 for \$4.00; 100 for \$7.00; 250 for \$15.00; 500 for \$27.50; 1000 for \$50.00.

Pecans.....	4 to 8 years.....	40x40 feet	28

Time required for trees and plants to begin fruiting after being transplanted may vary considerably, depending somewhat on the age and size of plant at time of transplanting, as well as the nature of the soil, care given, the season, and many other conditions. Even some varieties of a class will begin fruiting earlier than others, so the above table gives only approximate bearing ages under normal conditions.

Home Orchard Collection

COLLECTION "N"

Only
\$9.95

Especially selected to give you fruit ripening from early to late.

6 Peach Trees 2 1/2 to 4 ft.
